MILITARY CONSTRUCTION APPROPRIATION BILL, 1986

OCTOBER 31 (legislative day, OCTOBER 28), 1985 —Ordered to be printed

Mr. MATTINGLY, from the Committee on Appropriations,
submitted the following

REPORT

together with

MINORITY VIEWS

[To accompany H.R. 3327]

The Committee on Appropriations, to which was referred the bill (H.R. 3327) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1986, and for other purposes, reports the same to the Senate with various amendments, and presents herewith information relative to the changes made:

Amount of bill passed by House	\$8,372,730,000
Amount of increase by Senate over the House	272,403,000

Total of bill as reported to Senate	8,645,133,000
Amount of 1986 budget estimate	10,340,200,000
Amount of 1985 appropriations	8,405,206,000

The bill as reported to the Senate:

Under the budget estimate, 1986	1,695,067,000
Above appropriations for fiscal year 1985	239,927,000

S183-18

BACKGROUND

PURPOSE OF THE BILL

The Military Construction appropriation bill provides necessary funding for the planning, design, construction, alteration, and improvement of military facilities worldwide, both for Active and Reserve Forces. It also finances the construction, alteration, improvement, operation and maintenance of all military family housing, including payments against past housing mortgage indebtedness. Certain types of community impact assistance are provided, as well as assistance to members who face loss on the sale of private residences due to installation realignments. The bill is also the source for the U.S. share of NATO infrastructure construction costs.

COMPARATIVE STATEMENT

The fiscal year 1986 budget requests appropriations totaling \$10,340,200,000. The following table displays this request, and compares it with the current fiscal year, the House amount, and the Committee recommendation:

(3)

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY

Item	1985 Appropriation (2)	Budget estimate (3)	House allowance (4)	Committee recommendation (5)	1985 Appropriation (6)	Budget estimate (7)	House allowance (8)	Increase (+) or decrease (-) compared with—

Grand total, new budget (obligational) authority.....	8,405,206,000	10,340,200,000	8,372,730,000	8,645,133,000	+ 239,927,000	- 1,695,067,000	+ 272,403,000

SUMMARY OF THE BILL

The Committee recommends a total of \$8,609,943,000 in new budget authority/appropriations for fiscal year 1986 programs under its jurisdiction. Significant comparisons are noted below:

Fiscal year 1986 budget request: Budget authority	\$10,340,200,000
Committee recommendation for fiscal year 1986: Budget authority	8,645,133,000
Which is—	
Over new budget authority granted in fiscal year 1985 by	239,927,000
Under the budget request by	1,695,067,000
Over the House bill by	272,403,000

COMPLIANCE WITH SECTION 308 OF THE BUDGET CONTROL ACT

Section 308(a) of the Budget and Impoundment Control Act of 1974 (Public Law 93-344) requires that the Committee include in its report a comparison of its recommendations with levels contained in the First Concurrent Resolution. Appropriate data are reflected below:

BUDGETARY IMPACT OF BILL

PREPARED BY THE CONGRESSIONAL BUDGET OFFICE PURSUANT TO SEC. 308(a),
PUBLIC LAW 93-344

[In millions of dollars]

Financial assistance to State and local governments for 1986 in the bill.....		36		2

¹ Includes outlays from prior-year budget authority.

² Excludes outlays from prior-year budget authority.

COMMITTEE RECOMMENDATION

As previously noted, the Committee is recommending new fiscal year 1986 appropriations of \$8,645,133,000. This is \$1,695,067,000 under the budget request and \$272,403,000 above House allowances. The basis for this recommendation is contained in succeeding paragraphs for special interest items, and under the discussions pertaining to each individual appropriation.

ITEMS OF SPECIAL INTEREST

CONFORMANCE WITH AUTHORIZATION BILL

The Senate has passed the National Defense Authorization Act for Fiscal Year 1986 (S. 1029) which included the authorization for military construction. Because conference action on the military construction section of that legislation has not been completed, the Committee has used the Senate-passed authorization as the basis of its recommendations. However, it has come to the Committee's attention that several important projects which are not in the Senate authorization or the House-passed appropriation for military construction could not be considered in an appropriation conference unless they were included in this bill. Therefore, the Committee is recommending contingent upon authorization the following projects:

Alaska:

Eielson AFB: Central heat plant \$25,500,000

Fort Wainwright: Community impact assistance 1,000,000

Florida: MacDill AFB: Add/alter REDCOM headquarters 1,500,000

Georgia: Fort Benning: Upgrade unaccompanied officer housing 11,400,000

Germany: Various locations: Pershing II missile security 56,000,000

Hawaii:

Com. Oceanographic Sys. Pacific, Pearl Harbor: Naval ocean processing facility add 1,180,000

Wheeler AFB: Gymnasium 2,200,000

MILITARY CONSTRUCTION BUDGETING

The Committee has carefully reviewed the request of \$10,340,000,000 for military construction for fiscal year 1986. The Congress has determined that based on budgetary constraint that every agency of Government must make sacrifices.

The Committee has produced a bill which will provide the Defense Department with \$8,645,133,000 for new or modernized facilities and family housing (including operation and maintenance). The Committee recommendation has taken into consideration the importance of a balanced program for the modernization of our physical plant and has attempted to present a bill which will provide for the needed facilities without any impact on operational readiness.

The Committee has deferred a number of projects (see the individual service sections of this report) which will not impact on the day-to-day missions at our installations. Administrative facilities have been deferred wherever possible, and all child care centers have been deferred.

The Committee believes that because of the substantial budget increases that have been provided to the military construction accounts in

the past 5 years that the reductions taken this year will not in any way cause harm to our national defense posture.

BASE CLOSURES—OVERSEAS

The House in its report on the Military Construction appropriations bill (H.R. 3327) for fiscal year 1986 has included a "notional" list of bases at overseas locations to be closed and/or consolidated. The House, based on this notional list, has denied all projects requested at these locations.

While the Committee supports efforts to reduce defense spending through closure and consolidation of bases worldwide, the delay of essential mission and support projects located at notional installations identified by the House is not in consonance with either this goal or the defense mission of the services. In a period of a growing Soviet threat, operational considerations call for a dispersal of our forward deployed forces instead of consolidating them into an increasing target-rich environment. As the threat continues to grow, the methods required for successful combat becomes more complex. Denying projects until completion of a study to determine their desirability both in peace and war, delays the Department's ability to effectively train service personnel and creates a false economy. Many of the notional installations are located along lines of communication in rear areas and are sufficiently dispersed to be defensible. Due to existing land constraints, the Committee believes that relocation of these installations would be cost prohibitive. Closure would result in inadequate training, communications, supply, housing and ammunition support. Consequently, the Committee approves funding as noted in the service sections of this report for the facilities deferred at notional locations.

The Committee supports the House request for a report on the viability of closing or consolidating bases at overseas locations, but not limiting such a study to the bases mentioned in the House report. The Committee expects the Department to propose in its report locations that provide greater economic and defense incentives for closure or consolidation.

The Committee agrees with the House position that there is no pending action to close any U.S. military installation or facility since the Committee has not been notified as required by section 2687 of title 10 of the United States Code.

STIMULATING U.S. BUSINESS OVERSEAS

The Committee supports the House position taken on this important matter. The Committee understands that the so-called American preference program is working and is successful.

The House has made adjustments to the general provisions included in last year's bill with regard to American preference. The Committee agrees with the House position, but will review the impact of these provisions during fiscal year 1986 to insure that the taxpayer is receiving the best product for the best price.

Both in the Pacific and in Europe, the Committee believes that the Department must insure that American contractors who have the capability and expertise to construct our facilities are provided with every opportunity to compete against foreign firms which in many cases are heavily subsidized.

Packaging of contracts overseas.—The Committee recognizes that, in order to effectively package construction contracts, the decision must be made early in the design process. Further, the Committee notes that it does not make contracting sense to package all projects at a particular location, nor does it make sense to select installations without service input. On that basis, the Committee urges the Department to continue the practice of packaging similar types of construction work at a particular location into single contracts where practical. This practice increases the potential for U.S. firms to bid successfully and results in overall project efficiencies. The Committee directs each service to pursue this policy to the maximum extent possible. If the desired results are not achieved, the Committee may direct that certain projects or projects at a particular location be packaged in a future program year.

ALLIED BURDEN SHARING AND HOST NATION SUPPORT

The Committee continues to believe that our NATO allies and Japan must contribute to defense initiatives that provide for mutual security. The Committee believes that our NATO allies and Japan are improving their collective defense contribution as a group more than is commonly recognized. When results for individual countries are compared, it is true that these contributions are not consistent. However, given the current conventional force imbalance between NATO and the Warsaw Pact, the Committee understands the Department position to emphasize the need for both our allies and the United States to increase their defense efforts. The allies have made progress in this regard as evidenced by their recent agreement to substantially increase the NATO infrastructure program. Host nations have provided additional land for construction of new facilities which, in some instances, results in a forfeiture of tax revenues. The Committee recognizes the Department's strategy to focus attention on the NATO infrastructure program, rather than on individual service or U.S. unilateral initiatives. The viability of this strategy is evident in that the Department was successful in convincing the Federal Republic of Germany to support a NATO infrastructure program 50 percent larger than its original proposal. Other allies have committed to increasing their holdings of critical ammunition stocks and have adopted certain force goals to compensate for possible U.S. force deployments to Southwest Asia. Due to the complexity of the issue, there continues to be understandable differences of opinion over how best to characterize the burden sharing of our allies. However, the Committee recognizes that increased efforts on the part of all NATO member nations are needed to improve NATO's conventional capabilities. The Committee believes progress is being made and encourages the Department to increase the tempo of its efforts in conjunction with those of the State Department.

In light of the Committee's continued concern to increase allied burden sharing, host nation support and defense spending from our NATO allies and Japan, a sense of the Congress provision has been included as section 124 which has been carried in this bill for several years.

EUROPEAN CONSTRUCTION PROGRAM

NATO Infrastructure Program.—The Committee recommends \$38,000,000 to assure that the United States will be in a position to honor its financial commitments to the NATO infrastructure program. The House deleted the entire fiscal year 1986 request of \$98,000,000 based on the existence of a large unobligated balance in this account. Considering the strength of the dollar, a \$60,000,000 reduction is appropriate, but any further reduction would jeopardize the ability of the United States to participate in this burden sharing program. The NATO nations have recently agreed to a much larger program and hired additional personnel to accomplish project execution. Existing unobligated balances will be used to meet the accelerated accomplishment of the expanded infrastructure program.

Recoupment of prefinanced funds.—The Committee notes the steps taken by the U.S. European Command and by the U.S. Mission to the North Atlantic Treaty Organization [USNATO] to place additional emphasis on the recoupment of U.S. prefunded NATO infrastructure projects. The Committee is aware of the programming plan that has been developed to recoup these moneys owed the United States. In order to emphasize the importance that the Committee places on the recoupment of these funds, the Committee has included a provision in the bill that prohibits the funds provided for the infrastructure program from being obligated at a rate that exceeds that of the actual recoupment of funds programmed for recoupment in fiscal year 1986. According to information provided to the Committee by the Department of Defense, the amount programmed for recoupment during the current fiscal year is \$30,000,000.

U.S. contractors in infrastructure construction projects.—The Committee is in agreement with the House language with regard to the improvement of U.S. contractors ability to bid on infrastructure contracts. It is obvious that more can be done based on the accomplishments of the past year.

The House has suggested that the Department seek to change NATO procurement regulations to make them consistent with U.S. law in regard to subcontractor bidding procedures. The Committee has always been supportive of American preference and continues that support. However, the Committee is aware that in most instances a subcontractor is not directly involved in the bidding process and that even though a specific subcontractor may be named by a prime contractor that there is apparently no legal obligation between the prime and the subcontractor.

The Committee will carefully review the report requested by the House on this matter to insure that American firms are given every opportunity to compete on NATO contracts.

Master restationing plan.—The Committee agrees with the House that the Army has altered its plans on the scope of construction at the so-called MRP sites, and is modernizing at some existing locations. However, the Committee does not agree that continued dispersal in numerous locations will ultimately degrade their operational effectiveness. Army installations and unit communities are, with a few exceptions, stationed in accordance with both their peacetime and wartime missions. The Department is encouraged to continue to adhere to the goals of the master restationing plan whenever unit restationing opportunities occur.

Ground launched cruise missiles—Netherlands.—The Committee has provided the authorized level of funding for the facilities at the Woensdrecht Air Base in The Netherlands. The Committee is aware that the Parliament of The Netherlands will vote in the very near future on whether they will allow NATO to deploy the GLCM's in their country. The Committee is optimistic about the outcome of that vote. However, it seems to be in the best interest of all concerned to restrict the funds appropriated until after a positive vote from The Netherlands' Parliament. Therefore, the Committee directs that none of the funds appropriated in this bill for GLCM facilities in The Netherlands may be obligated until such time as a positive vote on deployment of the GLCM system in The Netherlands has been taken in the Parliament of The Netherlands.

Pershing II missile security.—The Committee has included \$56,000,000 for the security measures which are currently underway at U.S. Pershing II missile sites in Germany. The Committee understands that some of the funding being provided may be NATO eligible and directs the Department to insure that the appropriate documents have been filed with NATO to insure that any prefinanced projects will be eligible for recoupment. The Committee strongly endorses this program and directs the Department of Defense to include the necessary funds in fiscal year 1987 to complete the program. The Department is to notify the Committee not later than December 31, 1985, with regard to the status of the notification to NATO of those projects which are being prefinanced and are NATO eligible as well as those projects which could become NATO eligible at a later date.

PERSIAN GULF/INDIAN OCEAN

The Committee supports the House observation that the United States has devoted considerable resources to the development of facilities in the Persian Gulf area without significant support from NATO allies or Japan. The Committee recognizes that while major known project or site improvements are virtually complete, the strategic and national interests of the United States and our allies require that we keep the option open to add future projects to accomplish national objectives in this vital area if shortfalls are identified.

CARIBBEAN BASIN

The Committee is supportive of the so-called Caribbean Basin Initiative which has provided for the expansion of U.S. access in the region.

During fiscal year 1986, a large number of military exercises have been held in the area, especially Honduras. The Committee has retained the House provision which requires notification to Congress of any construction funds in support of exercises. The Committee also supports the House position that military construction projects necessary to house and feed our troops will be given every consideration if the mission so dictates. The Committee will review carefully the updated long-term construction plan for the Caribbean Basin when it is submitted to Congress in January 1986.

U.S. BASES IN THE PHILIPPINES

Clark Air Base and Subic Bay Naval Base in the Philippines are two of the largest U.S. military installations outside of the United States. The strategic importance of these installations with regard to U.S. interests in the Pacific and Indian Oceans is clearly recognized by the Committee.

The Committee is concerned over the continued reports of political, military, and economic instability in the Philippines. The current basing rights agreement between the Government of the Philippines expires in 1991, and the Committee hopes that the agreement will be extended as it is mutually beneficial.

The Committee has reviewed the military construction request for the Philippines in fiscal year 1986 in the amount of \$121,000,000. The Committee recommendation is \$104,000,000 for military construction and family housing. The Committee has deferred three small projects for administrative/low priority items consistent with a general reduction for these categories.

The Committee is concerned over reports about the lack of security at our bases in the Philippines. While the Committee is aware that perimeter security is the responsibility of the Government of the Philippines, it is recommended that the Department of Defense review and give special consideration to the needs for security at these installations both inside and outside the boundaries of the U.S. facilities. The Committee makes this recommendation based on reports that these installations are extremely open to the general public. Obviously, the safety of U.S. personnel, their dependents and the equipment and facilities at Clark Air Base and Subic Bay Naval Base is of vital concern to the Committee.

The Committee directs that the Department of Defense initiate a study on the security at these bases. The study should review all aspects of security—both from a United States and a Philippine view—and look especially at the ability to secure the bases from terrorist or insurgent activity. Such a detailed report should be available to the Congress not later than January 31, 1986.

While the Committee believes that our bases in the Philippines are permanent and will be occupied into the unforeseeable future, the Committee also feels that it is necessary to have contingency plans for any circumstance. Thus, the Department should undertake a study to initiate a contingency-planning effort which would analyze what military construction programming might be necessary to prepare alternate locations for the missions now in the Philippines. This study should be made available to the Congress not later than March 1, 1986.

The Committee believes that based on the concerns over U.S. bases in the Philippines that the Department should prepare a 5-year construction plan which assumes continued base access. The Committee is aware that many of our facilities in the Philippines are old and need replacement, and the Committee understands that there is a severe shortage of family housing on base. The Committee further understands that such a 5-year plan is just that—a plan—and that this plan will undoubtedly be subject to change prior to formal budget requests in any specific fiscal year. Such a plan should be submitted not later than March 1, 1986.

As stated earlier in this section, the Committee is fully aware and supportive of the vital mission which is undertaken at Clark Air Base and Subic Bay Naval Base. However, the Committee believes that security of our personnel and the investment in facilities and equipment must be given careful consideration by all interested parties.

MX MISSILE PROGRAM

The Committee has continually supported the construction program to support the MX missile. This missile is important for strengthening our land based intercontinental ballistic missile system.

The House reduced the access roads project at F.E. Warren by \$2,760,000, because the House authorization bill reduced the MX Program by the same amount. The House suggested the remaining funds are sufficient to fund roads and silo modifications for 30 additional missiles. The House action would provide facilities for only the first 30 MX missiles through fiscal year 1986. The Committee supports the Air Force request to provide facilities for the first 40 MX missiles. Therefore, the Committee has recommended \$55,800,000 for projects in support of the MX Missile Program. Of this amount, \$46,340,000 is for projects at F.E. Warren AFB, WY; \$8,300,000 for a support center facility at Hill AFB, UT; and \$1,160,000 for launch control center facilities at Ellsworth AFB, SD, and Offutt AFB, NE.

MEDICAL PROGRAM

The Committee is in full agreement with the House in regard to the military medical facilities. The recent blue ribbon panel report will hopefully provide the initiative to insure that facility requirements are carefully coordinated between the services.

Mobilization and readiness.—The Committee concurs with the concerns of the House with regard to the need for an overall Department

of Defense coordinated plan to provide prepositioned medical assets. However, in view of extensive coordinated efforts between the services in both the European and Pacific areas, the Committee has restored the \$31,500,000 requested for overseas medical mobilization facilities deferred by the House. This restoration does not relieve the Department of Defense from developing and submitting an overall plan but is intended in only eliminating any additional delays in supporting our personnel in the field. The Committee directs that none of the funds appropriated for this purpose may be obligated until the report is received. The Committee further directs that the report be provided not later than January 31, 1986.

PLANNING AND DESIGN

The Committee has provided the full authorized amount for planning and design accounts of all the services and defense agencies. The Committee strongly believes that the funds provided in this account are used toward satisfying many of the congressional concerns in the areas of value engineering, the involvement of the using agency in the design process, exploration of alternative construction methods, and contract packaging. The increased involvement of the services in these areas will not occur unless sufficient funding is provided. The Committee recognizes that the increased efforts of the services, particularly in value engineering and user involvement, may increase the overall design cost slightly. It is anticipated, however, that the increased cost of the design process will yield reductions in the overall project costs through construction phases. The Committee is not pleased with the number of reprogramming requests for additional planning and design funds in fiscal year 1985. The Committee questions the budgeting procedure of the Department in which it appears that insufficient funds are being requested to carry out the design activities.

Architect and engineer liability.—The Committee strongly endorses the language in the House report with regard to architect and engineer liability. The Committee is disturbed over two recent reprogrammings—one at Fort Irwin, CA; and one at Camp Pendleton (Bridgeport), CA—and the costs associated with them. In these two instances, one project was designed in-house and the other by a private concern. However, the Committee believes that in both cases better management and supervision of the projects might have prevented the costly reprogrammings.

The Committee is pleased that the Corps of Engineers and the Naval Facilities Engineering Command have given the highest priority to investigating the cause of these two reprogrammings. The Committee has requested the Department of Defense inspector general to supervise the investigations into the problems at Fort Irwin and Camp Pendleton. In addition, the inspector general will initiate an audit during fiscal year 1986 which will cover all aspects of military construction contracting.

Value engineering.—The Committee supports the House position that a strong value engineering program is necessary to provide sound eco-

nomical construction. This can best be accomplished by fully funding planning and design. The Committee does not agree with the House position that projects in the fiscal year 1986 program can be reduced by applying value engineering principles. The majority of value engineering savings have already been identified at the conceptual or early preliminary design stage. Applying value engineering principles at the final design stage will often result in lost design cost being greater than the savings realized at that stage.

Alternative construction methods.—The Committee has encouraged the use of alternative construction methods for the past several years. The Department has constructed a sufficient number of fabric structures to evaluate that type of construction. It is understood that fabric structures are capable of being erected in a minimum of time at a low initial cost. The services should continue to utilize fabric structure where appropriate and to report to this Committee by January 31, 1987, on the maintainability and serviceability of these structures.

User agency involvement in design process.—The Committee believes, as does the House, that greater user involvement during the design process should provide for user needs and should reduce changes during the construction process.

FINANCIAL MANAGEMENT

The Committee, like the House, is very interested in the management of military construction funds. The Committee has found that it is difficult to have a clear audit trail of what military construction funds have been spent and what funds remain. The House included a general provision, section 121, which provided a transfer authority. The Committee has deleted the House provision and included a different provision which will provide an easier accounting procedure for the Department, but most importantly, will provide the Congress with a much clearer picture of the status of the military construction accounts.

The Committee is aware that this provision will be reviewed by the House and looks forward to coming to a mutually acceptable provision during the conference on this bill.

The defense appropriation law annually includes a general provision that allows the Department to formally transfer funds between defense appropriations or subdivisions thereof. The general provision also requires congressional notification which has, over time, evolved into a prior approval reprogramming requirement. This provision of law provides the same type of flexibility that the milcon method currently provides in that excess funds in a given fiscal year within an appropriation can be applied to requirements in another fiscal year. It provides further flexibility since funds can be transferred between all appropriation accounts contained in the defense law which better allows the Secretary to manage his program. The advantages of this mechanism are clear—funds are physically moved to the fiscal year where project requirements exist, the transfer is formally documented and approved by Congress and the Treasury, and the Secretary has more flexibility in

reallocating funds where priorities dictate. For these reasons, the Committee has included this general provision similar to that in the defense law, but tailored it for military construction, which will permit more flexibility to the Department in terms of application of excess funds and greatly enhance the Department's ability to establish and maintain a clear, definitive track of program execution. This procedure should also enable the Department to have a full 5 years in which to fully obligate all construction projects. It is specifically noted that this section shall not be used to transfer funds from expiring appropriations in order to prevent resources from lapsing and being returned to the Treasury.

REPROGRAMMING CRITERIA

New reprogramming thresholds.—The Committee does not agree with the revised reprogramming criteria for military construction and new family housing construction projects as developed by the House. The Committee has always recognized that the complexities of the construction market make it difficult for the services to precisely estimate what a construction project will cost. This is reflected in the Committee's willingness to base project approval on the presentation of a 35-percent design estimate, which though it provides a reasonable degree of confidence in project cost, still is only an estimate. As a general rule, the services have always had some degree of flexibility to allow some variation in costs from the estimates presented to Congress because it is normal to expect some cost underruns as well as cost overruns.

The Committee is, however, very concerned over the growing number of reprogrammings. The Committee has chosen not to agree with the House recommendation on new thresholds primarily because these thresholds are covered by statute and should be addressed appropriately in the authorization bill and codified into military construction law.

The Committee will carefully weigh making such changes next year if there is not an improvement in the manner in which reprogrammings are handled.

Source of funds.—The Committee supports the House position on the source of funds for reprogrammings.

Funding new projects via reprogrammings.—The Committee agrees with the House position taken that new military construction projects requested through reprogramming should be emergencies and truly vital to national security.

Family housing—New reprogramming thresholds.—As with the regular military construction accounts, the Committee believes that some flexibility must be provided in order that the services can manage their programs in an orderly fashion. The Committee does not agree to change the current reprogramming thresholds for the family housing improvements, operations, maintenance, and leasing accounts.

End-of-year obligation rates.—The Committee agrees with the new general provision included by the House which limits end-of-year obligation rates. The provision is similar to one that applies to all other 1-year accounts of the Department.

Foreign currency fluctuation account.—The Committee is aware of a serious problem being faced by the individual services with regard to changing value of the dollar. The Committee has previously supported a foreign currency fluctuation account for military construction as a means to better manage the limited resources for military construction.

The Committee believes that the military construction accounts, as do the accounts in the Defense appropriations bill, need to have the flexibility of a foreign currency fluctuation account.

The Committee directs that such accounts be established from within available funds for each of the services. The Committee believes that these accounts should be maintained by the individual services rather than centrally at the OSD level.

MINOR CONSTRUCTION

The Committee is concerned over the use of minor construction funds. The Committee shares the House position that the minor construction accounts are supposed to be available for emergent needs of the services that could not have been anticipated at the time of the budget submissions.

The Committee feels that in order to get the Department's attention on this issue that it is necessary to make reductions in the individual military construction accounts for minor construction. The Committee has reduced each account by approximately 50 percent. The Committee expects that in future years the "Minor construction" account will indeed be used for the unforeseen circumstances for which it was designed.

New notification procedures.—The Committee agrees with the House position on notification of minor construction projects; however, the Committee directs that 30 days must pass without objection before the project may proceed.

Army National Guard minor construction.—The Committee shares the House position on the growth in the "Army National Guard minor construction" account. The Committee does not doubt the validity and need for the projects in question; however, the Committee does have concern over why the "Minor construction" account is used rather than the normal budget process. The dollar amount of the projects is irrelevant, and in many instances, similar projects throughout a State could be packaged and requested as a single line item. The Committee believes that in many instances this type of procedure would be faster than waiting to see if the "Minor construction" account will have adequate funds to complete all the requirements. As with the House, this Committee will not support huge lump sum appropriations for unspecified minor construction.

MODULAR STRUCTURES

The Committee, as it did in fiscal year 1985, agrees with the Department's approach of funding of modular and relocatable structures with other Milcon appropriations. The structures are for short-term peak

military missions and for operational projects to support specific operations, contingencies or war plans for specific geographic areas. Split funding is essential if the services are to quickly provide shelters for WRM in support of rapidly changing military threats.

The Committee has provided the requested funding for the Portomod support in Korea.

MODEL INSTALLATION PROGRAM [MIP]

Approximately 2 years ago, the Department established the Model Installation Program. The goal is to create installations that optimize both mission accomplishment and quality of life through plowing back into that installation savings resulting from innovative management of resources. The innovations are to be tested at a small number of installations of each of the services. Those innovations will involve waivers to standard procedures of the Department, to departmental regulations, and the seeking of changes to general and special provisions recurring annually in defense and Milcon laws as well as sections of the United States Code.

The Committee feels that there are indeed smarter ways to do business and lauds the Department's efforts in trying to identify those efficiencies. However, the Committee also recognizes that the laws as well as regulations and procedures of the Department have, in general, evolved to avail of cost-effective procedures while maintaining minimally adequate controls.

One MIP initiative has been to allow the Air Force to become its own design/construction agent for military construction at the designated MIP bases. Section 10 United States Code 2851 does permit the Secretary of Defense to approve the Air Force's assuming this function, normally limited to U.S. Army Corps of Engineers and the Naval Facilities Engineering Command, "to assure the most efficient, expeditious, and cost-effective completion of the project." The Committee views the key to the propriety of this delegation to the Air Force is whether or not the most cost-efficient completion is attained.

Accordingly, the Committee directs the Department to submit a report by January 15, 1986, on the MIP. The report will identify the number of personnel hired and to be hired by the Air Force, either through direct hire or contract, at each MIP base to accomplish the actions usually done by the Corps of Engineers and the Naval Facilities Engineering Command. It will show the value of Milcon involved by fiscal year and the total cost of the added Air Force effort—salaries, transportation, supplies, et cetera—and the source of funding. It will also indicate the numbers of personnel reduced from the Army and Navy design/construction agencies to specifically offset the increased Air Force effort and cost. Where the reductions to Army and Navy have not exceeded the increases to the Air Force, the report must quantify other benefits that justify transfer of the workload to the Air Force. The report will also indicate whether any consideration would be made in the future to establish a third design/construction agency, the Air

Force. If that answer is no, the report must, then, explain the reason to even conduct this particular test.

This Committee appropriates the funds that are used for operating the military family housing of the Department. These funds would be subject to other MIP initiatives in the areas of procurement of supplies and equipment, in contracts for services and real property maintenance contracts, et cetera. The report, mentioned above, will include a section that will provide a comprehensive listing of MIP initiatives that effect the use of NFH O&M resources. Each initiative will be explained by a short description of expected benefits.

DOD FACILITIES IN WEST VIRGINIA

The Committee understands the need to accelerate the military construction program contemplated for West Virginia which has been raised in hearings before the Senate Committees on Armed Services and Appropriations. The matter has been the subject of discussion on the Senate floor during the processing of the fiscal year 1985 supplemental appropriations bill. This need to accelerate the program has been the subject of correspondence with high-level military officials as well as discussions with the Secretaries of the Army and Air Force. The thrust of these discussions has been that early construction of these various projects will help provide much needed jobs; avoid the costs of inflation associated with delayed construction; and provide modern, updated facilities for use by military personnel in West Virginia. The Committee supports these arguments and direct the Department of Defense to redouble its efforts to accelerate the design of the various projects and to incorporate them into the fiscal year 1987 President's budget so that they may receive early consideration by the appropriate committees of Congress.

MILITARY CONSTRUCTION, ARMY

Fiscal year 1985 appropriation.....	\$1,593,137,000
Fiscal year 1986 request.....	2,020,900,000
House allowance.....	1,646,152,000
Committee recommendation.....	1,541,190,000

The Committee is recommending an appropriation of \$1,541,190,000 for the Army for fiscal year 1986. This amount reflects a decrease of \$479,710,000 to the budget request and a decrease to the House proposal in the amount of \$104,962,000.

Specific program changes in the Committee recommendation are discussed below: (See project listing at the end of the report for complete program recommendations.)

AUTHORIZATION REDUCTIONS

House adds.—The following projects were added by the House but have not been authorized by the Senate and, therefore, are not recommended by the Committee:

California: Sacramento Army Depot: Microwave comm. and radar facility...	\$1,900,000
Missouri: Fort Leonard Wood: Reception center.....	7,500,000
New York: Fort Drum:	
Community impact planning.....	1,000,000
Utilities.....	82,500,000
North Carolina: Fort Bragg: Land acquisition.....	10,800,000
Oklahoma: McAlester AAP: PBX production facility.....	2,300,000
Texas:	
Fort Bliss: Fire station.....	710,000
Fort Hood:	
Armored moving target range.....	4,600,000
Storage facility.....	7,200,000
Virginia: Fort Lee: Brigade operation center.....	1,032,000

Budgeted projects.—The following projects were requested as part of the budget but have not been authorized by the Senate and, therefore, are not recommended by the Committee:

Alabama: Redstone Arsenal: Child care center.....	\$1,500,000
Arizona: Fort Huachuca: Automated record fire range.....	730,000
California:	
Fort Irwin:	
Child care center.....	1,450,000
Community center.....	1,900,000
Sierra Army Depot: Ammo container loading yard.....	370,000
Colorado:	
Fort Carson:	
Child care center.....	2,600,000
Physical fitness center.....	4,100,000
Fitzsimmons Hospital: Physical fitness center.....	2,550,000

Georgia:	
Fort Benning: Recreation center.....	\$2,000,000
Fort Stewart: Tactical equipment shop	6,100,000
Kansas: Fort Riley: Tactical equipment shop.....	9,500,000
Kentucky:	
Fort Campbell:	
Physical fitness center	5,900,000
Radiant heaters	430,000
Fort Knox: Child care center.....	4,500,000
Louisiana: Fort Polk:	
Tactical equipment center	11,200,000
Physical fitness center.....	7,000,000
Massachusetts:	
Materials/Mechanics Research Center: Water pollution abatement.....	770,000
Fort Devens: NBC defense instruction facility.....	610,000
Missouri: Lake City AAP: Industrial wastewater treatment	19,000,000
New Mexico: Fort Wingate: Ammo container loading yard.....	490,000
New York: Fort Drum:	
Child care center.....	2,000,000
Fire station	990,000
North Carolina: Fort Bragg:	
Physical fitness center.....	2,000,000
Unaccompanied enlisted housing	2,950,000
Pennsylvania:	
Letterkenny Army Depot: Ammo truck loading and blocking.....	1,550,000
New Cumberland Army Depot: Eastern distribution center	88,000,000
Texas:	
Fort Bliss:	
Child care center.....	2,350,000
Physical fitness center	2,200,000
Fort Hood: Tactical equipment shop	7,700,000
Virginia:	
Fort Belvoir: Physical fitness center	2,800,000
Vint Hill Farms Station:	
Equipment testing and evaluation facility.....	5,900,000
Warehouse addition	950,000
Washington: Fort Lewis:	
Barracks with dining facility	4,850,000
Child care center.....	7,800,000
Company operations and supply.....	4,800,000
Korea:	
Camp Carroll: Medical supply warehouse.....	4,500,000
Location 177: Power upgrade.....	1,550,000

OTHER PROGRAM CHANGES

Projects funded contingent on authorization.—The following projects were not considered for authorization by the Senate but were authorized by the House. The House Military Construction appropriations bill does not contain the projects or provided only partial funding. The Committee believes the projects should be given consideration pending the outcome of the conference action on the authorization bill. The projects are funded contingent upon authorization at the amounts listed as follows:

Alaska: Fort Wainwright: Community impact assistance	\$1,000,000
Georgia: Fort Benning: Upgrade unaccompanied officer housing	11,400,000
Germany: Various locations: Pershing II missile security	56,000,000

Projects deferred due to budgetary constraints.—The Committee is deferring without prejudice a number of projects, primarily in the category of administrative facilities, due to constraints on the budget. The Committee believes that while these projects are important they will not have any adverse impact on readiness. The projects deferred are as follows:

California: Presidio of Monterey: Military personnel administrative center....	\$2,650,000
Georgia: Fort Gordon: Addition to data processing building	760,000
Maryland: Fort Detrick: Operations building	7,600,000
New Jersey: Fort Dix: Main library	1,850,000
New York: U.S. Military Academy: Modified record fire range	2,500,000
North Carolina: Fort Bragg:	
Battalion headquarters	1,500,000
Company operations and supply	1,650,000
Division headquarters	6,700,000
Texas: Fort Hood: Administration and text support facility	8,300,000
Virginia:	
Fort Belvoir: Automated data processing facility	4,300,000
Fort Myer: Administration facility	8,300,000
Germany:	
Friedberg: Community center	2,250,000
Fulda: Community center	2,250,000
Hanau: Tactical equipment shop	3,350,000
Vilsech: Community center	3,200,000
Greece:	
Upgrade multipurpose building	640,000
Upgrade operations/supply building	800,000
Korea:	
Yongson: Provost marshal command/control facility	1,450,000
K-16 Army Airfield: Tactical equipment shop	840,000
Italy: Camp Darby: Veterinary facility	500,000
Panama: Corozal: Unaccompanied officer personnel housing	2,200,000

Base closure initiative.—The House deferred a number of projects as part of the overseas base closure initiative discussed earlier in this report under "Items of Special Interest." The Committee disagrees with the House position and has restored some of the projects as follows:

Germany:	
Kaiserslautern: Tactical equipment shop	\$3,450,000
Karlsruhe:	
Battery shop	2,000,000
Tactical equipment shop	1,550,000
Pirmasens: Electronics maintenance facility	14,000,000
Wiesbaden: Flight simulator building	2,900,000

General reduction—Instruction facilities.—The House made a general reduction of \$4,300,000 to be applied against instruction facilities. The Committee believes the projects are justified at the amounts requested and has restored the House reduction. The projects involved are as follows:

Alabama: Fort McClellan: General instruction building	\$12,800,000
Georgia: Fort Gordon:	
Applied instruction building	5,800,000
Applied instruction building	14,600,000
Virginia: Fort Lee: General instruction building	9,100,000

General reduction—Multipurpose training ranges.—The House made a general reduction of \$8,500,000 to be applied against multipurpose training ranges. The Committee believes the projects are justified at the amounts requested and has restored the House reduction. The projects involved are as follows:

California: Fort Hunter Liggett	\$8,900,000
Colorado: Fort Carson	24,000,000
Kentucky: Fort Campbell	16,000,000
Washington: Yakima Firing Center	15,800,000
Germany: Wildeflecken	20,000,000

Various locations—Military operations in urban terrain [MOUT].—The House made reductions in this category of projects stating that the Army did not have adequate plans for the training program. The Committee has reviewed the justification for the program and supports the projects requested. The projects approved for funding are as follows:

Colorado: Fort Carson	\$4,550,000
Georgia: Fort Stewart/Hunter	3,700,000
Hawaii: Schofield Barracks	3,850,000
Kansas: Fort Riley	5,000,000
Washington: Fort Lewis	4,000,000
Germany: Hohenfels	3,250,000

House estimate reductions.—The House made reductions to a number of projects which the Committee believes should be funded at higher levels than the House recommended. Those projects are as follows:

Alabama:	
Fort McClellan: UOPH	\$3,550,000
Fort Rucker: UOPH	5,900,000
Alaska: Fort Wainwright: Barracks modernization	12,000,00
California: Fort Irwin: Hospital upgrade and addition	8,000,000
Georgia: Fort Benning: Trainee barracks	17,000,000
Illinois: Rock Island Arsenal: Modernize REARM facility	29,000,000
New York: U.S. Military Academy: Expand EMCS	5,900,000
Conus classified: Classified project	3,000,000
Korea: Yongson: Chapel/religious education center	2,150,000

House deferrals.—The House denied or deferred funding for the projects listed below which the Committee believes are fully justified and, therefore, has recommended appropriations as noted:

Arkansas: Pine Bluff Arsenal: Binary munitions facility	\$10,800,000
Georgia: Fort Benning: Highway crossing, U.S. 280	9,400,000
Kansas: Fort Riley: Tactical equipment shop	3,100,000
Louisiana: Fort Polk: Battalion headquarters	1,050,000
New York: U.S. Military Academy: General instruction building	7,300,000
South Carolina: Fort Jackson: Dining facilities modernization	6,600,000
Utah: Dugway Proving Ground: Operations building	3,600,000
Virginia:	
Fort Belvoir: Intelligence command and control facility	30,000,000
Humphries Engineer Center: Topographic lab	11,000,000
Washington: Fort Lewis:	
Battalion headquarters	630,000
Tactical equipment shop	3,000,000
Germany:	
Heidelberg: Operations building	1,800,000
Rheinberg: Purchase of support facility	11,600,000
Japan: Kawakami: Medical supply warehouse	1,050,000
Korea:	
Camp Carroll:	
Calibration laboratory	1,600,000
Controlled humidity warehouse	19,500,000
Camp Humphreys: Flight simulator building	1,850,000
K-16 Army Airfield: Flight simulator building	1,700,000
Panama: Corozal:	
Barracks modernization	4,550,000
HVAC systems modifications	930,000

Defense access road—Pearl River and Hancock Counties, MS.—The Committee directs the Department of the Army to initiate planning and design in cooperation with the Military Traffic Management Command [MTMC] for Texas Flat Road—a defense access road which provides improved access to the Mississippi Army Ammunition Plant by means of a gate relocation and which also serves the National Space Technological Laboratories. This project, as appropriate, should be included in the fiscal year 1987 military construction budget request.

New Cumberland Army Depot, PA: Eastern Distribution Center.—The Committee has deferred without prejudice the funding requested for the Eastern Distribution Center at the New Cumberland Army Depot in Pennsylvania. The \$88,000,000 project is not authorized in the Senate. The House appropriations bill recommends incrementally funding the project with the fiscal year 1986 level at \$15,000,000. The Committee is supportive of this important project which is a part of the Army's modernization program for supply functions. The Committee understands that the project will be authorized by the conference committee on the military construction authorization bill for fiscal year 1986. If authorized, the Committee will support its inclusion in the conference agreement on the fiscal year 1986 military construction appropriations bill.

MILITARY CONSTRUCTION, NAVY

Fiscal year 1985 appropriation.....	\$1,534,592,000
Fiscal year 1986 request.....	2,085,200,000
House allowance.....	1,703,705,000
Committee recommendation.....	1,632,620,000

The Committee is recommending \$1,632,620,000 for Navy and Marine Corps military construction projects in fiscal year 1986. This amount reflects a decrease of \$71,085,000 to the House approved amount and a decrease of \$452,580,000 from the budget request.

Specific program changes reflected in the Committee recommendation are discussed below: (See project listing at the end of the report for complete program recommendations.)

AUTHORIZATION REDUCTIONS

House adds.—The following projects were added by the House but have not been authorized by the Senate and, therefore, are not recommended by the Committee:

California: Naval Shipyard Mare Island/Vallejo: Sewage treatment plant.....	\$5,100,000
New York: Naval Station:	
Berthing pier and bulkhead.....	39,700,000
Utilities/site improvements.....	14,600,000
Barracks.....	8,200,000
Mess hall.....	1,900,000
Community impact planning.....	1,000,000
North Carolina: Naval Air Rework Facility, Cherry Point: Blade rework facility.....	15,900,000
Washington: Naval Station, Everett: Community impact planning.....	1,000,000
Various locations: Gulf coast homeporting: Community impact planning.....	1,000,000

Budgeted projects.—The following projects were requested as part of the budget but have not been authorized by the Senate and, therefore, are not recommended by the Committee:

California: Marine Corps Base, Twenty-nine Palms:	
Child care center.....	\$1,490,000
Physical fitness center.....	5,380,000
Camp Pendleton: Santa Margarita water project.....	1,540,000
Naval Air Rework Facility, Alameda:	
Energy monitoring and control system.....	780,000
Paint and refinishing hangar.....	24,200,000
Naval Amphibious School, Coronado/San Diego: Combat swimmer trainer facility.....	3,430,000
Naval Construction Battalion Center, Port Hueneme: Chapel and religious education building.....	2,080,000
Naval Electronic Systems Engineering Center, San Diego: Fleet support center.....	27,450,000
Naval Post Graduate School, Monterey: Ocean sciences academic building.....	13,000,000
Naval Station, Long Beach: Construction battalion unit complex.....	1,230,000
Naval Station, San Diego: Child care center.....	845,000
District of Columbia: Navy Yard: Administration office modernization.....	6,300,000
Florida: Naval Station, Mayport: Child care center.....	2,240,000
Georgia: Kings Bay: Drydock (partial reduction).....	85,600,000
Hawaii: Intelligence Center Pacific, Pearl Harbor: Intelligence center addition.....	2,900,000

Illinois: Naval Training Center, Great Lakes:	
Barracks.....	\$10,600,000
Diesel engineman training facility addition.....	4,360,000
Physical fitness center.....	5,780,000
North Carolina:	
Marine Corps Air Station, Cherry Point: Child care center.....	1,490,000
Naval Facility Radio Island: Equipment washdown and land acquisition.....	17,640,000
Pennsylvania: Naval Air Development Center, Warminster: Navigation equipment lab.....	4,220,000
South Carolina:	
Marine Corps Air Station, Beaufort: Child care center.....	900,000
Naval Weapons Station, Charleston: Gymnasium.....	840,000
Virginia:	
Fleet Combat Training Center Atlantic, Dam Neck: Chapel and religious education building.....	2,490,000
Naval Amphibious Base, Little Creek: Combat swimmer training facility.....	4,070,000
Guam: Naval Comm. Area Master Sta. WESTPAC: Child care center add.....	615,000
Japan: Naval Comm. Station, Yokosuka: Fleet operations control center.....	21,490,000

OTHER PROGRAM CHANGES

Projects funded contingent on authorization.—The following project was not considered for authorization by the Senate but was authorized by the House. The House Military Construction appropriations bill does not contain the project. The Committee believes the project should be given consideration pending the outcome of the conference action on the authorization bill. The project is funded contingent upon authorization at the amount listed as follows:

Hawaii: Com. Oceanographic Sys. Pacific, Pearl Harbor: Naval ocean processing facility add.....	\$1,180,000
---	-------------

Projects deferred due to budgetary constraints.—The Committee is deferring without prejudice a number of projects, primarily in the category of administrative facilities, due to constraints on the budget. The Committee believes that while these projects are important they will not have any adverse impact on readiness. The projects deferred are as follows:

Arizona: Marine Corps Air Station, Yuma: Battalion headquarters.....	\$2,050,000
California:	
Marcorp Air-grnd Comb Ctr, Twenty-nine Palms:	
Battalion and battery headquarters.....	2,840,000
Brigade headquarters.....	2,880,000
Marine Corps Air Facility, Camp Pendleton: Group headquarters building.....	1,470,000
Marine Corps Base, Camp Pendleton:	
Battalion headquarters.....	3,300,000
Special intelligence support facility.....	1,520,000
Naval Weapons Center, China Lake: Pay and personnel support office.....	785,000
Navy Tact Interop Spt Act, North Island: Headquarters building.....	585,000
Connecticut: Naval Hospital, Groton: Hospital expansion.....	8,720,000
District of Columbia: Navy band: Band building modernization.....	1,900,000

Florida:	
Naval Air Station, Whiting Field: Pay and personnel support office	\$810,000
Navy Reg Data Automation Ctr, Jacksonville: Data processing center ...	10,300,000
Navy Tact Interoperability Spt Act, Mayport: Tactical data systems facility	470,000
Hawaii: Intelligence Center Pacific, Pearl Harbor: Intelligence center addition	2,900,000
Ohio: Navy Finance Center, Cleveland: Data processing center addition	2,940,000
Tennessee: Naval Air Station, Memphis: Naval legal service building	1,370,000
Virginia:	
Naval Space Command, Dahlgren: Command and control center	4,700,000
Navy Regional Data Automation Ctr, Norfolk: Data processing center ..	10,880,000
Washington: Naval Hospital, Oak Harbor: Hospital addition	13,900,000
Italy: Naval Air Station, Sigonella: Administrative and security facilities	3,880,000
Spain:	
Naval Communication Station, Rota: Operational storage	395,000
Naval Station, Rota: Fire alarm system	1,030,000
United Kingdom: Personnel Support Activity, London: Pay and personnel support office	450,000
Worldwide various: Various locations: Host nation infrastructure support	980,000

Various projects—House reductions to cost estimates.—The Committee recommends the following funding levels for the projects listed which were reduced by the House because of concern over cost estimates and sizing. The Committee has reviewed each of these projects and believes the estimates provided by the Navy to be justified. The projects are as follows:

Alaska: Naval Security Group Activity, Adak: Security improvements	\$400,000
California:	
Amphibious Task Force, Camp Pendleton: Landing craft air cushion complex	9,020,000
Marine Corps Air Station, El Toro: Hazardous waste facility and oil spill prevention	900,000
Naval Air Rework Facility, North Island: Engineering lab	9,120,000
Naval Ship Weapon Sys. Eng. Station, Port Hueneme: Weapon systems engineering buildings	10,780,000
Naval Station, Long Beach: BEQ	16,000,000
Naval Submarine Base, San Diego: Improve elec. distr. sys.	14,120,000
Pacific Missile Test Center, Point Mugu: BEQ	10,200,000
District of Columbia: Naval Research Lab: Electronic warfare lab	27,000,000
Florida:	
Naval Air Station, Cecil Field: Air combat range	26,250,000
Naval Hospital, Jacksonville: Hospital addition	18,600,000
Georgia: Kings Bay Naval Submarine Base:	
BEQ	5,400,000
Explosives handling wharf	39,010,000
Tender mooring/lay berths	23,500,000
Hawaii: Marine Corps Air Station, Kaneohe Bay: Electrical distribution system improvements	4,220,000
Maryland: Naval Electronic System Engr., St. Inigoes: Combatant communications assembly and test facilities	4,560,000
Nevada: Naval Air Station, Fallon: Range improvements	12,000,000
South Carolina: Naval Station, Charleston: BEQ	9,100,000
Virginia: Naval Shipyard, Norfolk/Portsmouth: BOQ	5,600,000
Washington: Naval Shipyard, Puget Sound, Bremerton: Steam plant (phase IV)	55,800,000

Diego Garcia:	
Naval Air Facility: Maintenance hangar	\$15,200,000
Naval Support Facility:	
BOQ	8,920,000
Laundry bldg addition	3,280,000
Guam: Naval Supply Depot: Cold storage warehouse addition	6,550,000
Cuba: Guantanamo Bay: BOQ	9,600,000
Italy: Naples support activity: Supply facilities	7,750,000
Japan: Navy Public Works Center, Yokosuka: Electrical distribution system improvements	4,400,000

House deferrals.—The House denied or deferred a number of projects which the Committee believes are justified and should be accomplished during fiscal year 1986. The projects are recommended for appropriation as follows:

California:

Marine Corps Air Station Tustin: Helicopter maintenance training building	\$2,250,000
Naval Construction Battalion Center, Port Hueneme: Seabee operations headquarters	5,880,000
Naval Weapons Center, China Lake: Ordnance research lab	6,860,000

Florida:

Naval Air Station, Cecil Field: Training range debriefing facility	785,000
Naval Air Station, Jacksonville: Brig	2,600,000
Naval Tech Trng Center, Pensacola: Crypto trng bldg	1,370,000

Maryland:

Naval Academy, Annapolis: Brigade activity center	21,600,000
Naval Medical Clinic, Annapolis: Naval hospital	12,540,000

Rhode Island:

Naval Education and Training Center, Newport:	
BOQ	8,700,000
Senior enlisted academy	3,430,000

South Carolina:

Marine Corps Recruit Depot, Parris Island: Clothing issue building	2,630,000
Naval Weapons Station, Charleston: Ammo overhaul shop	3,230,000
Tennessee: Naval Air Station, Memphis: Brig	2,725,000
Washington: Naval Station, Seattle: Brig	2,950,000
Antigua: Naval facility: Facility upgrade	2,410,000
Guam: Naval station: Fleet hospital support facilities	10,200,000
Iceland: Naval station, Keflavik: Airfield improvements	20,150,000
Philippines: Naval Air Station, Cubi Point: Maintenance hangar	12,500,000
United Kingdom: Naval activities, London: Fleet hospital support facilities	6,850,000

General reduction—Training buildings.—The House made a general reduction of \$12,690,000 to be applied against training buildings. The Committee disagrees with this reduction and has restored the funding.

Naval Air Station, Memphis, Millington, TN—South entrance road.—The Committee's understanding is that the project P-018 for a new entrance road on the south side of NAS Memphis Millington was not included in the fiscal year 1986 budget submission for reasons of budget constraints. The Department is, therefore, directed to include, in its budget submission for fiscal year 1987, the south entrance road project which is currently estimated to cost \$2,500,000.

Naval Submarine Base, Kings Bay, GA.—The Committee continues to be pleased with the excellent program which is progressing rapidly and will provide the east coast Trident base at Kings Bay, GA. The Com-

mittee notes that many of the estimates presented to the Congress in the fiscal year 1986 budget have been reduced in this bill. In recent years, some of the bids at Kings Bay have come in under the estimates. However, the estimates on many facilities are one-of-a-kind and, therefore, were based on the best information. The Committee commends the Navy for the excellent management of the construction program at Kings Bay.

Naval Construction Battalion Center, Gulfport, MS.—The Committee has approved \$2,100,000 for the repair of damages caused by Hurricane Elena. Authorization for this project is 10 United States Code 2854.

Washington State tax liability.—The Committee has included \$23,500,000 to satisfy a claim owed by the Navy for prior year taxes on military construction projects. This claim is funded at this time because interest is accruing at the rate of \$3,788 a day. The Committee has taken a general reduction from the Navy account to cover this claim as it would normally be considered for a reprogramming action. This claim, which lost appeals at the Supreme Court, was discussed in last year's report.

Washington Navy Yard.—The Committee disagrees with the House position that it would be economical to vacate leased space in the Crystal City, VA, area and relocate to new or modernized facilities in the Washington Navy Yard. The Committee continues to believe that the excess office space in the Washington, DC, area will keep leasing costs below costs to build at the navy yard.

Minor construction.—The Committee directs the Department of the Navy to provide funding from the unspecified minor construction account for the following two projects:

1. Small arms range—\$720,000—Naval Construction Battalion Center, Gulfport, MS. This project is needed to support the homeporting of the Ninth Active Duty Naval Mobile Construction Battalion at Gulfport, as provided in the fiscal year 1985 Department of Defense Authorization and Appropriations Acts. This range will also be used by other military activities in the area, including the National Guard.

2. Security fence—\$450,000—Meridian Naval Air Station, Meridian, MS. This security fence is urgently needed for reasons of aircraft safety and munitions security.

Microcomputer training courses, Meridian Naval Air Station.—Last year, the Committee directed the Department of the Navy to proceed with the design of a training services building at Meridian Naval Air Station to develop and implement training for the use of microcomputers for applications aboard deploying units and at shore installations. Since that time, the situation has changed and a large shipment of microcomputers was delivered to Meridian Naval Air Station. Therefore, this year the Committee recommends that the Department of the Navy establish Navywide training courses at Meridian Naval Air Station, using 160 new microcomputers already on hand in existing facilities, while continuing the design of needed computer training facilities.

Design of runway/taxiway extension, Meridian Naval Air Station.—The Committee directs the Department of the Navy to proceed with the design of a runway/taxiway extension at Meridian Naval Air Station. The acceleration of the design of this project is urgently needed for reasons of aircraft safety and deficiency of operations. This project, as appropriate, should be included in the fiscal year 1987 military construction budget request.

Naval Undersea Warfare Museum, Keyport, WA.—The Committee is aware of plans to build a Naval Undersea Warfare Museum in Keyport, WA. The Committee understands that this museum has been officially approved by the Secretary of the Navy in SECNAV Notice 5430. The Committee directs the Secretary of the Navy, or his designee, to work with the trustees of the Naval Undersea Warfare Museum Foundation in order to seek a method for the Navy to provide assistance to the foundation with regard to funding from within available Navy appropriations. The Committee directs the Navy to take into consideration report language previously included in the military construction appropriation bill which limits one museum per service which can receive appropriated funding.

Portsmouth Naval Shipyard, NH.—The Committee commends the consistently fine performance of the Portsmouth Naval Shipyard in the overhaul of nuclear attack submarines. As such, continued modernization of the facilities at the Portsmouth Naval Shipyard is clearly in the interests of national security. Of central significance in this process is the urgent requirement for construction of a covered drydock to ensure the continuation of repair and maintenance operations in all weather conditions. Accordingly, the Committee directs the Navy to expedite conceptual development of this important project and to request planning and design funding and construction funding in the earliest possible budget submissions.

Naval Air Development Center, Warminster, PA: Navigation equipment laboratory.—The Committee has deferred without prejudice the funding requested for the navigation equipment laboratory at the Naval Air Development Center in Warminster, PA. This \$4,220,000 project is not authorized by the Senate. However, the Committee understands that the project will be included in the authorization conference agreement; and if authorized, the Committee will support its inclusion in the conference agreement on the fiscal year 1986 military construction appropriations bill.

MILITARY CONSTRUCTION, AIR FORCE

Fiscal year 1985 appropriation.....	\$1,572,655,000
Fiscal year 1986 request.....	2,082,000,000
House allowance.....	1,585,140,000
Committee recommendation	1,718,863,000

The Committee has recommended an appropriation of \$1,718,863,000 for the Air Force in fiscal year 1986. The recommendation amounts to a decrease of \$363,137,000 from the budget request and an increase to the House recommendation of \$133,723,000.

Specific program changes reflected in the Committee recommendation are discussed below: (See project listing at the end of the report for complete program recommendations.)

AUTHORIZATION REDUCTIONS

House adds.—The following projects were added by the House but have not been authorized by the Senate and, therefore, are not recommended by the Committee:

Alabama: Maxwell AFB: VOQ	\$3,500,000
Arkansas: Blytheville AFB: Petroleum ops facility	510,000
California: McClellan AFB:	
Ammo storage complex/land acq	3,500,000
Regional waste water connection	5,800,000
Florida: Eglin AFB: Fuel cell repair facility	2,300,000
Illinois: Scott AFB: Add/alter computer facility	7,800,000
Oklahoma: Vance AFB: Mission support facility	3,550,000
Washington: Fairchild AFB: Replace elec. distribution system	12,500,000

Budgeted projects.—The following projects were requested as part of the budget but have not been authorized by the Senate and, therefore, are not recommended by the Committee:

Alabama: Maxwell AFB: Add/alter historical research center	\$2,800,000
Arizona: Davis-Monthan AFB: Base civil engineer admin facility	2,500,000
Arkansas: Blytheville AFB: Aircraft gen. purpose maint. shop	3,750,000
California:	
Beale AFB: Religious education facility	1,100,000
George AFB:	
Resource management facility	7,400,000
Visiting personnel quarters	7,600,000
McClellan AFB: Logistics system ops center	10,300,000
District of Columbia: Bolling AFB: OSI facility	12,000,000
Florida: MacDill AFB: Base contracting facility	1,300,000
Louisiana: England AFB: Base civil engineer admin. facility	2,300,000
Massachusetts: Hanscom AFB: Library-education center	2,450,000
Missouri: Whiteman AFB: Add/alter gym	2,400,000
Nevada: Nellis AFB: Consolidated support center	6,000,000
New Jersey: McGuire AFB: Add/alter gym	1,550,000
Oklahoma:	
Altus AFB:	
Base supply admin	1,900,000
Recreation center	1,710,000
Tinker AFB: Add/alter recreation center	1,600,000
Tennessee: Arnold Engineering Center: Engineering analysis facility	16,900,000
Texas:	
Carswell AFB: Chapel center	2,150,000
Goodfellow AFB: Recreation center	2,450,000
Kelly AFB: Add/alter VOQ	1,950,000
Wisconsin: Billy Mitchell Field: Admin facility	500,000
Germany:	
Ramstein AFB: Indoor pool	2,800,000
Rhein-Main AB: Add/alter passenger terminal	10,100,000
Japan: Yokota AB: Base supply admin	3,350,000
Netherlands: Woensdrecht AB: Various GLCM facilities	6,720,000
Spain: Torrejon AB: Alter electric substation	2,637,000

United Kingdom:

RAF Greenham Common:

Alter arts/crafts shop.....	\$300,000
Auto hobby shop.....	340,000
RAF Mildenhall: Consolidated support center.....	4,150,000

OTHER PROGRAM CHANGES

Projects deferred due to budgetary constraints.—The projects listed below have been deferred due to budgetary constraints. The Committee has reviewed the projects and believes that none of the projects will have any impact on operational or readiness missions. The projects are as follows:

Alabama: Gunter AFB: Add to computer facility.....	\$6,000,000
Arizona: Luke AFB: F-16 wing headquarters facility.....	1,350,000
California:	
Castle AFB: Engine inspection and repair shop.....	1,300,000
March AFB: Air division headquarters.....	2,200,000
Mather AFB: Accounting-finance facility.....	1,500,000
Travis AFB: Weapons sys maint mgt support facility.....	6,200,000
Colorado: U.S. Air Force Academy: Add/alter computer center.....	440,000
Illinois: Scott AFB: Administrative facility.....	550,000
Massachusetts: Hanscom AFB: Systems management engineering facility.....	11,000,000
Michigan: K.I. Sawyer AFB: ALCM-alter operations facilities.....	360,000
New Mexico: Kirtland AFB: Munitions storage complex.....	47,000,000
North Dakota: Minot AFB: Security police facility.....	5,000,000
Oklahoma: Altus AFB: Weapons systems-maintenance mgmt facility.....	2,550,000
South Carolina: Shaw AFB:	
Add/alter weapons system maint mgt fac.....	1,100,000
Consolidated support center.....	6,450,000
Texas:	
Brooks AFB: Vehicle maintenance shop.....	2,500,000
Bergstrom AFB: Commercial transportation facility.....	770,000
Wyoming: F.E. Warren AFB: Data processing facility.....	1,550,000
Belgium: Florennes:	
Clothing sales store.....	240,000
Consolidated open mess.....	1,950,000
Conus various: Base Thirty-four: ALCM-SATAF facility.....	320,000
Germany:	
Bitburg AB: Weapons system maintenance control.....	2,200,000
Pruem AS: Operations facility.....	540,000
Rhein-Main AB: Religious education facility.....	930,000
Italy:	
Comiso AB:	
Consolidated open mess.....	3,000,000
Exchange facilities.....	3,280,000
San Vito AS: Education center.....	490,000
Korea: Kunsan AB: Consolidated support facility.....	2,850,000
Panama: Howard AFB: Add to aircraft apron.....	21,000,000
Philippines: Clark AB:	
Add/alter maint mgt and operations fac.....	1,750,000
Add/alter passenger terminal.....	4,150,000
Consolidated support facilities-phase II.....	4,400,000
Spain:	
Torrejon AB: Various facilities.....	9,550,000
Zaragoza AB: Various facilities.....	2,750,000
Turkey: Incirlik AB: Consolidated support center.....	4,500,000

United Kingdom:	
RAF Fairford: Clinic/dental clinic.....	\$7,400,000
RAF Greenham Common: Youth center.....	800,000
RAF Lakeenheath: Gym.....	2,500,000
RAF Molesworth:	
GLCM-vehicle operations complex.....	200,000
Post office.....	530,000
Vehicle maintenance shop.....	4,050,000

House reductions.—The Committee has reviewed the projects listed below which were either reduced by the House or deferred. The Committee believes the projects are fully justified and has recommended funding at the noted levels:

Alabama: Maxwell AFB: Sq. officers school leadership dev. complex.....	\$1,900,000
Alaska:	
Eielson AFB: Maintenance hangar.....	6,000,000
King Salmon AFB:	
Add/alter composite operations facility.....	3,000,000
Fire station.....	5,600,000
Shemya AFB:	
Add/alter central powerplant.....	27,500,000
Composite personnel housing/alert facility.....	9,600,000
Liquid fuel pipeline system.....	8,800,000
California:	
Edwards AFB: Add/alter flight test mission center.....	4,800,000
Sunnyvale AFS: Alter mission control complex.....	2,700,000
Travis AFB: Add/alter flight simulator trng bldg.....	2,000,000
Colorado:	
Lowry AFB: Add/alter academic classrooms (PMEL).....	3,500,000
Peterson AFB: Text dev. and trng center (phase 2).....	5,200,000
AF Academy:	
Add/alter aeronautics lab.....	3,400,000
Prep school facilities.....	3,670,000
Delaware: Dover AFB:	
Ancillary explosive complex.....	2,300,000
Runway extension.....	13,800,000
Florida:	
Eglin AFB: Heavy metal weapons R&D facility.....	5,500,000
Tyndall AFB: Consolidated trng facility.....	1,550,000
Georgia: Robins AFB: Large item storage facility.....	5,400,000
Illinois:	
Chanute AFB: Medical WRM facility.....	330,000
Scott AFB: SATCOM ground terminal.....	4,270,000
Nebraska: Offutt AFB:	
Add/alter enlisted dining facility.....	3,400,000
Command post.....	5,700,000
New Mexico: Cannon AFB:	
Holloman AFB: Add/alter RATSCAT facilities.....	13,700,000
Melrose range land acq.....	12,500,000
South Carolina:	
Charleston AFB:	
Aerial refueling task trng.....	1,140,000
POL facility.....	480,000
Shaw AFB:	
Add/alter special operations facility.....	2,000,000
Wing headquarters.....	2,100,000

Texas:	
Lackland AFB: SATCOM ground terminal	\$2,950,000
Sheppard AFB: Medical trng facility	14,000,000
Wyoming: Warren AFB:	
MX land easements	2,100,000
MX launch facility site work	6,200,000
Conus unspecified: Support facility	55,000,000
Belgium: Florennes: Chapel center	1,750,000
Germany:	
Ahlhorn AB: Acft maintenance unit facility	350,000
Einsiedlerhof: VOQ	2,900,000
Hessisch: Base engineer maint. shop and warehouse	1,230,000
Kapaun: Telecomm. facility	900,000
Lahr AB: Chemical warfare protection/squadron ops	1,600,000
Leipheim AB: Aircraft maintenance unit facility	350,000
Norvenich AB: Acft maint. unit facility	350,000
Pruem AS: Warehouse	710,000
Ramstein AB:	
Composite alert facility	2,050,000
Warehouse	1,900,000
Rhein-Main AB: Flight simulator: trng facility	2,000,000
Spangdahlem AB: Field trng facility	2,100,000
Sweibucken AB:	
Add/alter fire station	1,350,000
EDS forward storage warehouse	1,150,000
EDS UOPH	2,450,000
Telecomm. facility	750,000
Greenland: Thule AB: Various facilities	12,350,000
Italy:	
Aviano AB:	
Telecom facility	920,000
VOQ	4,150,000
Decimomannu AB: VOQ	900,000
Japan:	
Camp Zuma: SATCOM ground terminal	1,500,000
Kadena AB:	
Jet fuel storage	6,100,000
Tactical control ops facility	2,950,000
Korea:	
Kinhae AB: Medical contingency complex	10,400,000
Various locations: Portomod support	1,730,000
Kwang-Ju AB: Various facilities	16,050,000
Osan AB: Various facilities	16,250,000
Netherlands: Woensdrecht AB: GLCM various facilities	15,980,000
Panama: Howard AFB: Facility energy improvements	2,172,000
Portugal: Lajes Field: POL storage tanks	19,435,000
Turkey:	
Ankara: Transient lodging facility	950,000
Incirlik AB: Medical contingency complex	1,150,000
United Kingdom:	
RAF Alconbury:	
Flight simulator trng facility	1,150,000
Base ops facility	910,000
RAF Sculthorpe: Munitions storage igloos	2,350,000
RAF Upper Heyford: Religious education facility	1,200,000
Base 29: PLSS various facilities	3,500,000

Projects funded contingent on authorization.—The following projects were not authorized by the Senate, but were authorized by the House.

However, the House did not recommend funding for the projects. The Committee believes that the projects are fully justified and should be given consideration pending the outcome of the conference action on the authorization bill. The projects listed below are funded contingent upon authorization at the amounts noted:

Alaska: Eielson AFB: Central heat plant	\$25,500,000
Florida: MacDill AFB: Add/alter REDCOM headquarters	1,500,000
Hawaii: Wheeler AFB: Gymnasium	2,200,000

Langley AFB, VA—ASAT facilities.—The Committee has deferred without prejudice the \$14,900,000 requested for construction of an operational antisatellite [ASAT] facility at Langley AFB, VA.

The Committee previously supported these facilities and that support has not changed. However, based on information with regard to the initial operational capability date at Langley and on production schedules for the ASAT system, the Committee believes that these projects should be included in the fiscal year 1987 request. The Committee understands the importance of this system, but due to budgetary constraints, all projects which could not be obligated during fiscal year 1986 have been deferred.

Langley AFB, VA—Land acquisition.—The Committee has recommended \$3,750,000 for a project which was deferred from a reprogramming request. The Committee has supported this project in previous years and believes that funding through the normal budget process is the most efficient method to get approval for this request.

Keesler AFB, MS—Hurricane damage.—The Committee has recommended \$8,800,000 authorized by 10 United States Code 2854 for the restoration or replacement of damaged or destroyed facilities. Keesler AFB was severely damaged during the recent Hurricane Elena. This money will help to repair some of the damage.

The Committee is aware of several other projects which have deficiencies and need to be replaced at the earliest possible time. Those projects include the replacement of building 230 at \$7,000,000; underground electrical distribution lines for family housing at \$6,000,000; hospital water supply storage system at \$4,000,000; and underground electrical service lines at \$1,200,000. The Committee directs the Air Force to begin design immediately on these projects and to include them in the fiscal year 1987 budget request.

Minor construction.—The Committee directs the Department of the Air Force to provide funding from the unspecified minor construction account for the following two projects at Keesler Air Force Base, Biloxi, MS:

1. Medical storage [WRM]—\$960,000—WRM storage is currently housed in a semipermanent World War II building originally constructed as a training facility. This building is a makeshift warehouse that does not meet present or future mission requirements and is located across the base from the hospital which promotes inefficient operations.

2. Petroleum operations facility—\$580,000—The present facility is a semipermanent World War II building also used as a fuel storage office, with open-flame heaters, presenting serious fire and safety hazards.

Blytheville Air Force Base, AK.—The Committee has deferred without prejudice two projects which are not authorized by the Senate. Funding for these two projects—aircraft general purpose maintenance shop, \$3,750,000; petroleum operations facility, \$510,000—is included in the House bill. The Committee notes that the Secretaries of Defense and the Air Force continue to support funding for these projects in fiscal year 1986. The Committee has deferred funding for these projects because of the lack of authorization; however, the Committee is supportive of these projects and will recede to the House position in the conference agreement on the fiscal year 1986 military construction appropriations bill.

MILITARY CONSTRUCTION, DEFENSE AGENCIES

Fiscal year 1985 appropriation.....	\$302,198,000
Fiscal year 1986 request.....	309,600,000
House allowance.....	124,955,000
Committee recommendation.....	208,350,000

The Committee has recommended appropriations totaling \$208,350,000 for projects considered within the "Defense agencies" account. The amount recommended reflects an increase of \$83,395,000 to the House figure and a decrease of \$101,250,000 to the budget request.

Specific program changes reflected in the Committee recommendation are discussed below: (See project listing at the end of the report for complete program recommendations.)

House reductions.—The House made reductions or deleted a number of projects which the Committee has carefully reviewed. The Committee believes that the projects listed below are fully justified and has provided the funding as noted:

Connecticut: DPDO Groton: Conforming storage.....	\$625,000
Georgia: Fort Benning: Elementary schools expansion.....	1,693,000
Kansas: DPDO Fort Riley: Covered storage.....	965,000
Maryland: Fort Meade: NSA research facility.....	21,364,000
New York: Defense Fuel Support Point Verona: Covered storage.....	1,395,000
North Carolina:	
Fort Bragg: Elementary school replacement.....	5,660,000
Camp Lejeune: High school facility.....	8,400,000
South Carolina: Myrtle Beach AFB: Add/alter Woodlawn Park School.....	1,400,000
Texas:	
DPDO Texarkana: Storage facility.....	2,635,000
Mineral Wells National Guard Center: Repromat secure storage facility..	900,000
Utah: Defense Depot Odgen: Facility rehab.....	3,315,000
Virginia:	
DPDO Richmond: Conforming storage.....	650,000
Defense General Supply Center: Conforming storage.....	3,400,000
Quantico: New elementary school.....	3,500,000
Wyoming: DPDO Warren AFB: Covered storage.....	1,020,000

Japan:

Defense Fuel Support Point Okinawa: Fuel tankage..... \$8,160,000
 Defense Fuel Support Point Tsurumi: Fuel pier..... 2,800,000

Korea: Defense Fuel Support Point Pyongtaek: Fuel tankage..... 5,820,000

National Defense University, Fort McNair, DC—Academic instruction facility.—The Committee defers this \$24,940,000 facility which is designed to be used for library requirements, classroom space, and administrative space. The Committee takes this action based on budgetary constraint because this facility will not impact directly on operational or readiness missions.

Overseas schools.—The Committee has provided funding at the following levels for schools at overseas locations where the House denied or reduced the funding level:

Belgium: Florennes: Elementary and high school \$7,420,000
 Germany:

Bamberg:

Elementary school addition 3,390,000
 Middle and high school addition 2,410,000

Pirmasens: Elementary/junior high addition 1,630,000

Schweinfurt: Junior high school 3,930,000

Sembach AB: Elementary school addition 2,170,000

Vilseck: Elementary school 6,680,000

Italy: Sigonella: Elementary and high school addition 5,360,000

Japan:

Misawa: Elementary school addition 4,780,000

Okinawa: Jennings elementary school 445,000

Korea:

Osan AB: Elementary school addition 2,780,000

Pusan AB: Elementary and high school addition 1,540,000

Taegu AB: Elementary and high school addition 730,000

Netherlands: Soesterberg: Elementary school 4,460,000

Philippines: Clark AB: High school 7,190,000

United Kingdom:

Bicester: Elementary school 4,570,000

Upwood: Elementary school addition 3,240,000¹

Woodbridge: Elementary addition 1,060,000

Minor construction.—The Committee has recommended a reduction of \$2,000,000 to the "Defense agencies, minor construction" account. This issue was discussed earlier in the report under items of special interest.

General reductions.—The Committee agrees with the House position on the general reduction for the Defense Logistics Agency in the amount of \$37,025,000. In addition, the Committee has recommended a general reduction to the "DOD schools" account in the amount of \$3,500,000.

Fort Stewart, Hinesville, GA—Middle school.—The Committee is aware of the unusual situation which involves the Liberty County schools—particularly the need for a new middle school. Liberty County includes Fort Stewart which became home to a new division in 1975. The enormous impact on the local community was, unfortunately, not recognized by the Department of Defense; and no community impact assistance was provided similar to that which is now provided to new in-

stallations or to established installations which have their missions dramatically changed.

Because some 10 years have passed since the division was placed at Fort Stewart, the fluctuation in the number of students (3,000 in 1975 to 6,600 in 1985) has leveled off to the point that Liberty County can no longer qualify for impact aid construction funding through the Department of Education. However, while the student population remains basically constant, the need for a middle school is very real as it has been for several years.

The Committee directs the Director of the DOD schools to review the situation involving Fort Stewart to determine when funding can be provided to help alleviate this situation. The Committee further directs that this review be coordinated with the DOD Office of Economic Adjustment and that a report be submitted to the Committee not later than December 15, 1985.

NATO INFRASTRUCTURE

Fiscal year 1985 appropriation.....	\$107,200,000
Fiscal year 1986 request.....	98,000,000
House allowance.....	
Committee recommendation.....	38,000,000

The Committee recommendation for the "NATO infrastructure" account is \$38,000,000. This amount is \$60,000,000 below the President's budget and \$38,000,000 above the House allowance. Detail on the Committee's recommendation for this account is discussed earlier in the report under "Items of Special Interest."

MILITARY CONSTRUCTION, GUARD AND RESERVE COMPONENTS

Fiscal year 1985 appropriation.....	\$407,709,000
Fiscal year 1986 request.....	428,600,000
House allowance.....	383,331,000
Committee recommendation.....	358,522,000

The Committee recommends \$358,522,000 for military construction projects for the Guard and Reserve components. This amount is \$70,078,000 below the budget request and \$24,809,000 below the House recommendation.

Individual component recommendations are as follows:

Component	Budget request	Committee recommendation
Army National Guard	\$102,100,000	\$86,657,000
Air National Guard	137,200,000	112,205,000
Army Reserve.....	70,700,000	59,900,000
Naval Reserve	51,800,000	39,660,000
Air Force Reserve	66,800,000	60,100,000

Specific program changes reflected in the Committee recommendation are discussed below: (See project listing at the end of the report for complete program recommendations.)

PROGRAM CHANGES

ARMY NATIONAL GUARD

The Committee recommendation for projects requested by the Army National Guard totals \$86,657,000.

The Committee has approved all requested projects with the exception of a project in Massachusetts for an armory addition/modification at \$1,031,000. That project is deferred without prejudice pending the outcome of the necessary State funding and approval. The Committee has denied funding for those projects which were approved via a reprogramming during fiscal year 1985. Each of these actions is in agreement with the House position.

The Committee has not approved any projects which were not requested as part of the budget and were, therefore, not authorized in the Senate.

The House recommended a general reduction of \$12,843,000 to the Army National Guard. The Committee has restored the House reduction in order to provide the necessary funds for previously approved projects which were used as a source of funding for the reprogramming mentioned earlier.

Minor construction.—The Committee, as stated earlier in the report, has recommended a reduction of about 50 percent to each minor construction account contained in the bill. The recommendation for the "Army National Guard" account for minor construction is \$10,000,000.

Utah Army National Guard headquarters.—The Committee is aware of the proposed relocation of the Utah National Guard headquarters and supporting activities, to the currently vacant Applied Digital Data Systems [ADDS] Building at Draper, UT. The Committee supports the efforts of the National Guard to increase efficiency and to gain the needed workspace at significant savings. The Committee recognizes that the existing facilities cannot be expanded to accomplish the increases in workloads because of site constraints. Because of the overall benefits associated with the relocation of the Utah National Guard headquarters, direct maintenance and training functions, the Committee directs the National Guard Bureau to include the moneys necessary to meet the Federal obligation for this project in the military construction budget request for fiscal year 1987. The Committee also directs the National Guard Bureau to complete the required design of the necessary alterations and modifications so the National Guard's recommendations are prepared for the fiscal year 1988 budget request.

AIR NATIONAL GUARD

The Committee recommendation for projects requested by the Air National Guard is \$112,205,000.

The Committee has approved all projects requested as part of the budget for fiscal year 1986. The Committee has not included any projects added by the House due to a lack of Senate authorization.

The Committee understands that due to continued good bids on previously approved projects that the Air National Guard has savings available to apply against the new request. The Committee has agreed with the House general reduction of \$13,850,000.

Minor construction.—Consistent with all other accounts, the Committee has taken a 50-percent reduction to the "Minor construction" account and recommends \$4,000,000 for the Air National Guard for minor construction.

Glynn County, GA, Air National Guard facility.—The Committee has included a general provision (section 125) which provides for the transfer of certain property from Glynn County, GA, to the Air National Guard in return for which the Air National Guard will vacate existing inadequate and poorly located facilities. This move will provide the 244th Combat Communications Squadron with a greatly improved location at an airport in order to meet its mission requirement. The Air National Guard is directed to begin design immediately on the facilities necessary to accommodate this unit at its new location, and the Committee further directs that the projects required for this move be included in the fiscal year 1987 budget request.

ARMY RESERVE

The Committee recommendation for the Army Reserve program for fiscal year 1986 is \$59,900,000.

The Committee has approved all projects requested as part of the President's budget. The Committee has not recommended any House add-on projects due to a lack of Senate authorization.

The Committee, due to budgetary constraint, has recommended a general reduction to this account in the amount of \$8,000,000 which can be absorbed through existing balances and/or continued good bids.

Minor construction.—The Committee has recommended a reduction to this account consistent with other accounts. The recommendation for Army Reserve minor construction is \$3,000,000.

NAVY RESERVE

The Committee recommends \$39,660,000 for military construction projects for the Naval and Marine Corps Reserve.

The Committee has approved all projects requested as part of the fiscal year 1986 budget submission, but has not included any funds for projects added by the House but not authorized in the Senate.

The Committee has included funding in the amount of \$1,400,000 for a training building acquisition at the Navy/Marine Corps Reserve Center in Charlotte, NC. This amount is authorized but had been deferred in a reprogramming action.

Due to budgetary constraints, the Committee has taken a general reduction of \$11,400,000 to the "Naval Reserve" account.

Minor construction.—Consistent with the Committee position in this bill, the "Minor construction" account for the Naval Reserve has been reduced to \$800,000.

AIR FORCE RESERVE

The Committee is recommending \$60,100,000 for projects requested by the Air Force Reserve.

The Committee recommendations includes all projects requested as part of the President's budget, but does not include any add-on projects due to lack of Senate authorization.

Because of budgetary constraints, the Committee has recommended a general reduction of \$5,000,000 to be absorbed from within existing appropriations for the Air Force Reserve military construction program.

Minor construction.—The Committee recommendation of \$1,700,000 for the "Air Force Reserve minor construction" account is consistent with the reductions taken throughout the bill in this area.

FAMILY HOUSING, ARMY

Fiscal year 1985 appropriation.....	\$1,348,432,000
Fiscal year 1986 request.....	1,625,764,000
House allowance.....	1,435,652,000
Committee recommendation.....	1,560,290,000

The Committee recommends \$1,560,290,000 for family housing, Army in fiscal year 1986 which is \$65,474,000 below the budget request and \$124,638,000 above the House recommendation.

NEW CONSTRUCTION

The Committee has approved funding for new construction as listed below:

<i>Location/project</i>	<i>Recommended</i>
New construction:	
California: Fort Ord: 600 units.....	\$49,559,000
Colorado: Fort Carson: 50 sites.....	712,000
Georgia: Fort Stewart: 20 sites.....	253,000
Kansas: Fort Riley: 50 sites.....	700,000
Kentucky: Fort Campbell: 50 sites.....	689,000
Massachusetts:	
Army Mat and Mech Research Ctr: 1 unit (failed authorization)....	0
Fort Devens: 20 sites (failed authorization).....	0
New York: Fort Drum: 800 units (contingent upon authorization).....	67,500,000
North Carolina: Fort Bragg: 50 sites.....	637,000
Utah: Dugway Proving Ground:	
104 units.....	8,323,000
24 sites.....	351,000
Virginia: Fort Myer: 6 units.....	593,000
Germany:	
Bamberg: 106 units.....	7,209,000
Grafenwoehr: 138 units.....	6,120,00
Vilseck: 370 units.....	26,830,000

CONSTRUCTION IMPROVEMENTS

The Committee has recommended the Senate authorized level of \$166,000,000 for this account.

Watervliet Arsenal, NY—Family housing improvements.—The Committee supports the House recommendation to fund and accomplish a

\$1,500,000 family housing improvements project at the Rotterdam housing area at the Watervliet Arsenal in New York. The Committee has restored the House reduction taken against this account and directs that the Watervliet project be accomplished within appropriations available for this purpose.

PLANNING AND DESIGN

The Committee recommends \$19,020,000 for this account as requested in the budget.

GENERAL REDUCTION

The Committee has recommended a general reduction to the "Family housing, Army construction" account in the amount of \$35,000,000.

OPERATION, MAINTENANCE, AND LEASING

The Committee has supported the budget request for each of these accounts for a total of \$1,254,717,000. However, due to budgetary constraints, the Committee believes that a general reduction can be absorbed during fiscal year 1986 within these accounts. The general reduction is in the amount of \$30,000,000.

FAMILY HOUSING, NAVY

Fiscal year 1985 appropriation.....	\$681,075,000
Fiscal year 1986 request.....	738,739,000
House allowance.....	673,280,000
Committee recommendation.....	705,201,000

The Committee recommends \$705,201,000 for family housing, Navy in fiscal year 1986 which is \$33,538,000 below the budget request and \$31,921,000 above the House allowance.

NEW CONSTRUCTION

The Committee has approved funding for new construction as listed below:

<i>Location/project</i>	<i>Recommended</i>
New construction:	
Alaska: Naval Station Adak: 100 units.....	\$15,500,000
California:	
Fleet Trng Group Pacific Warner Springs: 44 units.....	4,400,000
Marcorps Air-grnd Comb Ctr Twentynine Palms: 100 units.....	8,400,000
Marine Corps Air Station El Toro: 282 units.....	29,800,000
Naval Complex San Diego: 200 units.....	15,000,000
New Jersey: Naval Weapons Station Earle: 200 units.....	15,400,000
Pennsylvania: Aviation Supply Office Philadelphia: 1 unit.....	170,000
Philippines: Navy Public Works Center Subic Bay: 300 units.....	24,180,000

CONSTRUCTION IMPROVEMENTS

The Committee recommends \$34,020,000 for the account. This amount was agreed to by the House and was the budget request level.

PLANNING AND DESIGN

The Committee recommends \$6,930,000 for the "Planning and design" account. This level is consistent with the budget request and the House recommendation.

GENERAL REDUCTION

The Committee has recommended a general reduction to the "Family housing, Navy construction" account in the amount of \$7,000,000.

OPERATION, MAINTENANCE, AND LEASING

The Committee has supported these accounts for a total of \$556,099,000. However, due to budgetary constraints, the Committee believes that a general reduction can be absorbed during fiscal year 1986 within these accounts. The general reduction is in the amount of \$15,000,000.

FAMILY HOUSING, AIR FORCE

Fiscal year 1985 appropriation.....	\$912,043,000
Fiscal year 1986 request.....	943,698,000
House allowance.....	851,816,000
Committee recommendation.....	908,698,000

The Committee recommends \$908,698,000 for family housing, Air Force in fiscal year 1986 which is \$35,000,000 below the budget request and \$56,882,000 above the House recommendation.

NEW CONSTRUCTION

The Committee has approved funding new construction of family housing units for the Air Force as follows:

<i>Location/project</i>	<i>Recommended</i>
New construction:	
California: Los Angeles AFS (failed authorization).....	0
Massachusetts: Hanscomb AFB (not authorized in Senate).....	0
South Dakota: Belle Fourche: 50 units.....	\$4,000,000
Belgium: Florennes: 400 units.....	29,200,000
Germany:	
Hahn AB: 440 units.....	33,000,000
Ramstein AB: 400 units.....	30,000,000
Korea: Osan AB.....	0
Netherlands: Camp New Amsterdam: 140 units.....	11,000,000
Philippines: Clark AB: 450 units.....	37,900,000

CONSTRUCTION IMPROVEMENTS

The Committee has recommended \$65,300,000 for this account which reflects the Senate authorized level.

PLANNING AND DESIGN

The Committee recommendation is the same as the House at \$5,000,000.

GENERAL REDUCTION

The Committee has taken a \$16,000,000 general reduction from the "Family housing, Air Force construction" account.

OPERATION, MAINTENANCE, AND LEASING

The Committee recommends \$713,993,000 for these accounts.

However, due to budgetary constraints, the Committee believes that a general reduction can be absorbed during fiscal year 1986 within these accounts. The general reduction is in the amount of \$20,000,000.

Keesler Air Force Base, MS—Hurricane damage.—The Committee has included \$4,000,000 within the "Construction improvement" account to be used to repair the damage which was caused by Hurricane Elena. The authority for this recommendation is 10 United States Code 2854, restoration or replacement of damaged or destroyed facility.

Korea—Accompanied tours.—The Committee is concerned over recent reports that the Air Force is planning to make the majority of their assignments in Korea accompanied. The Committee believes that further accompanied tours in Korea are not in the best interests of the vital missions assigned to our Korean bases. In addition, the Committee is deeply concerned over estimated costs to provide family housing and the necessary support facilities which range upward to \$1,000,000,000. The Committee directs that none of the funds provided in this bill or prior military construction bills be used for the design or planning of any facilities associated with increased accompanied tours in Korea. The Committee further directs that a report on the Air Force's plans for accompanied tours in Korea be provided to the Committee not later than January 1, 1986.

FAMILY HOUSING, DEFENSE AGENCIES

Fiscal year 1985 appropriation.....	\$17,437,000
Fiscal year 1986 request.....	20,300,000
House allowance.....	14,300,000
Committee recommendation.....	19,000,000

The Committee recommends \$19,000,000 for family housing, Defense Agencies in fiscal year 1986 which is \$1,300,000 below the budget request and \$4,700,000 above the House recommendation.

NEW CONSTRUCTION

The Committee has approved \$1,800,000 for the construction of 20 new units of housing at a classified location for the National Security Agency.

CONSTRUCTION IMPROVEMENTS

The Committee supports the budget request level and House approved level of \$110,000,000 for this account.

OPERATIONS, MAINTENANCE, AND LEASING

The Committee has supported the budget request for these accounts totaling \$18,390,000. However, due to budgetary constraints, the Committee believes that a general reduction can be absorbed during fiscal year 1986 within these accounts. The general reduction is in the amount of \$1,300,000.

GENERAL PROVISIONS

The Committee has made no changes to sections 101 through 112 and 114 through 120 of the general provisions included in the House bill. Other changes are as follows:

Section. 113. The House included a general provision which prohibits the sale of Fort DeRussy, HI. The provision has been carried in this bill for many years; however, the need for this provision has been overtaken by events in that the sale of this land is now in the best interests of the Government. The Committee has included a new general provision which allows for the sale and/or transfer of the property. The provision is as follows:

SEC. 113. (a) Notwithstanding any other provision of law, including but not limited to section 809 of the Military Construction Act, 1968, section 807(d) of the Military Construction Act, 1984, or any provision of an annual Appropriation Act restricting the use of funds for the sale, lease, rental, or excessing of any portion of land currently identified as Fort DeRussy, Honolulu, Hawaii, the Secretary of the Army (hereinafter referred to as the "Secretary") is authorized to sell or convey, at the appraised fair market value as determined by the Secretary, all right title and interest of the United States in up to forty-five acres of land and improvements northwest of Kalia Road comprising a portion of Fort DeRussy, Hawaii, to the City and County of Honolulu or the State of Hawaii or their designated agencies, upon such terms and conditions as are acceptable to the Secretary. The exact acreages and legal descriptions of the property to be sold under this section shall be determined by surveys which are satisfactory to the Secretary. The cost of any such surveys shall be borne by the buyer.

(b) The Secretary is authorized to acquire land and design and construct such facilities as are necessary to replace those on the land to be sold pursuant to subsection (a). The Secretary is also authorized to relocate activities currently located at Fort DeRussy to such replacement facilities.

(c) The proceeds of the sale authorized to be conducted pursuant to subsection (a) shall be available without fiscal year limitation to acquire land and replace facilities authorized to be acquired or constructed pursuant to subsection (b) and to pay associated relocation costs. The remainder of the proceeds shall be converted into the Treasury as miscellaneous receipts.

(d) Any action under this section shall insure adequate parking for the Hale Koa Hotel—Armed Forces Recreational Area. Authority provided by subsections (b) and (c) shall extend to replacement and relocation of facilities at Fort Shafter to another site to accommodate relocation of Reserve facilities from Fort DeRussy.

Section 121. The House adopted a floor amendment, section 121, which involves the financial management of the "Military construction" account. The Committee has deleted the House amendment and included a general provision which allows for the transfer of funds which will provide a clear audit trail for military construction appropriations. This section is discussed earlier in the report under items of special interest. The new provision is as follows:

SEC. 121. Upon determination by the Secretary concerned that such action is necessary in the national interest, he may transfer funds available for military construction and military family housing between such appropriations or funds or any subdivision thereof, to be merged with and to be available for the same purposes, and for the same time period, as the appropriation or fund to which transferred: Provided, That such authority to transfer may be used only for military construction functions authorized by law, but in no case where the item for which funds are requested has been denied appropriations by Congress: Provided further, That the Secretary concerned shall notify the appropriate committees of Congress semiannually of all transfers made pursuant to this authority.

Section 122. The House included this general provision which involves the transfer of responsibilities between districts of the Corps of Engineers in Memphis and Little Rock. The Committee believes that it is not appropriate to make such changes in legislation that does not have control over the Corps of Engineers; therefore, the general provision has been deleted from the Senate bill.

Section 123. The House included this general provision which involves the transfer of equipment from the Army to the United States Modern Pentathlon Association. The Committee has deleted this provision but will get further information from the Army on the proposal and give the provision further consideration during conference action on this bill.

NEW PROVISIONS

Section 122. The Committee has included this provision which is identical to a provision in last year's act. The section provides that funds appropriated in this act may not be made available to any nation that the President certifies to Congress is not taking adequate steps to cooperate with the United States in stemming the flow of narcotic drugs and other controlled substances into this country. The text of the provision is as follows:

SEC. 122. (a) None of the funds appropriated in this Act may be available for any country if the President determines that the government of such country is failing to take adequate measures to prevent narcotic drugs or other controlled substances cultivated or produced or processed illicitly, in whole or in part, in such country, or transported through such country, from being sold illegally within the jurisdiction of such country to United States personnel or their dependents, or from being smuggled into the United States. Such prohibition shall continue in force until the President determines and reports to the Congress in writing that—

(1) the government of such country has prepared and committed itself to a plan presented to the Secretary of State that would eliminate the cause or basis for the application to such country of the prohibition contained in the first sentence; and

(2) the government of such country has taken appropriate law enforcement measures to implement the plan presented to the Secretary of State.

(b) The provisions of subsection (a) shall not apply in the case of any country with respect to which the President determines that the application of the provisions of such subsection would be inconsistent with the national security interests of the United States.

Section 123. The Committee has included this provision which was adopted during conference consideration of last year's bill and was incorporated into the fiscal year 1984 act. The section places a limit on expenditures for consultants and consulting services. The text of the provision is as follows:

SEC. 123. Of the total amount of budget authority provided for fiscal year 1986 by this Act that would otherwise be available for consulting services, management and professional services, and special studies and analyses, 10 per centum of the amount intended for such purposes in the President's budget for 1986, as amended, for any agency, department or entity subject to apportionment by the Executive shall be placed in reserve and not made available for obligation or expenditure: Provided, That this section shall not apply to any agency, department or entity whose budget request for 1986 for the purposes stated above did not amount to \$5,000,000.

Section 124. The Committee has included a sense of the Congress provision included in past acts pertaining to increased defense spending by our allies. The provision is as follows:

SEC. 124. It is the sense of the Congress that the administration should call on the pertinent member nations of the North Atlantic Treaty Organization and on Japan to meet or exceed their pledges for at least a 3 per centum real increase in defense spending and furtherance of increased unity, equitable sharing of our common defense burden, and international stability.

Section 125. The Committee has added a new general provision which will allow the transfer of property owned by the Air National Guard for other land at the Glynn County, GA, Jetport. The provision is as follows:

SEC. 125. (a) Notwithstanding section 13(g) of the Surplus Property Act of 1944 (50 App. U.S.C. 1622(g) and sec. 4 of the Act of October 1, 1949 (50 App. U.S.C. 1622(c)), the Secretary of Transportation, if requested, shall, as to the property described in subsection (c), in order to facilitate an exchange of land negotiated between the State of Georgia and the County of Glynn, Georgia, grant a release to the County of Glynn, Georgia, from all of the terms, conditions, reservations, and restrictions contained in the deed of conveyance dated July 1, 1975, under which the United States conveyed certain property to the County of Glynn, Georgia, for airport purposes. This provision does not apply to the portion of the property, conveyed by that deed, that is not specified in subsection (c). This provision is subject to the conditions of subsection (b).

(b) (1) The County of Glynn finds that the property obtained in exchange for the property described in subsection (c) is equivalent in value to the property described in subsection (c).

(2) Revenue derived from the land obtained by the County of Glynn in exchange for the property described in subsection (c) must be used for the development, improvement, operation, or maintenance of a public airport.

(3) The property described in subsection (c) shall be used by the State of Georgia in a manner compatible with airport purposes.

(4) Approval of the Secretary of Transportation must be obtained prior to any subsequent transfer by the State of Georgia of the property described in subsection (c). Such approval shall be given only if the Secretary finds that the property will continue to be used in a manner compatible with airport purposes.

(c) Subsection (a) applies to the following described area known as the Glynco Jetport Tract:

GLYNCO JETPORT TRACT

To locate the point of beginning, proceed from the intersection of the eastern right-of-way of Canal Road with the northern right-of-way of the Glynco Parkway, north 16 degrees 31 minutes 05 seconds east along the eastern right-of-way of Canal Road for a distance of 342.33 feet to a concrete monument which is the point of beginning; thence, continue north 16 degrees 31 minutes 05 seconds east along the eastern right-of-way of Canal Road for a distance of 1,160.25 feet to a concrete monument; thence, proceed south 73 degrees 28 minutes 55 seconds east for a distance of 514.8 feet to a concrete monument located on the western right-of-way of the Brunswick-Altamaha

Canal; thence, proceed south 12 degrees 31 minutes 00 seconds west along the western right-of-way of the said canal for a distance of 910.66 feet to a concrete monument located on the northern right-of-way of the Glynco Parkway; thence, proceed south 65 degrees 01 minutes 04 seconds west along the northern right-of-way of the Glynco Parkway for a distance of 219.54 feet to a concrete monument which is a point of curvature; thence continue along the said right-of-way for a distance of 31.0 feet along the arc of a curve having a delta angle of 13 degrees 00 minutes, a tangent of 334.95 feet, and a radius of 2,939.79 feet to a concrete monument; thence, proceed north 85 degrees 53 minutes 24 seconds west for a distance of 398.00 feet to a concrete monument located on the eastern right-of-way of Canal Road and is the point of beginning.

Section 126. The Committee has approved a new general provision that prohibits the expenditure of funds for construction, operation, or maintenance of commercial franchise facilities on military installations within the United States. A similar provision was approved by Senate and House conferees on the fiscal year 1986 Defense authorization bill. The Committee believes that such a provision is necessary because the military exchange services have apparently embarked on an extensive test program involving the construction of national franchise facilities on military installations. The Committee believes that further, more detailed information is required before an informed decision can be made on whether such a program should continue. The provision reads as follows:

SEC. 126. None of the funds appropriated to the Department of Defense in this or any other Act may be obligated or expended to construct, operate, or maintain any facility that—

- (1) is located on a military installation in the United States;*
- (2) is to be used for the operation of a commercial franchise business; and*
- (3) is not identified in a contract, supplemental agreement to a contract, a contract solicitation, or a letter of intent agreed to on or before May 23, 1985.*

Section 127. The Committee has included a general provision with regard to the expenditure of funds from the "NATO Infrastructure" account. The provision is discussed earlier in the report under items of special interest. The provision is as follows:

SEC. 127. Notwithstanding any other provision of law, funds appropriated by this Act for the United States contribution to the North Atlantic Treaty Organization Infrastructure program may not be obligated or expended at a rate exceeding the rate of recoupment during fiscal year 1986 of \$30,000,000 of prefunded United States contributions to this account.

Section 128. The Committee has included a new section which involves changes to the so-called Davis-Bacon Act. The Committee provision, which was adopted by the Senate earlier this year, codifies the Department of Labor administrative reforms which apply to all construction; and increases from \$2,000 to \$1,000,000 the threshold for construction contracts that are exempt from the Davis-Bacon Act. The Davis-Bacon Act requires the payment of prevailing wages on Federal construction projects of \$2,000 or more. In recent years, however, many economists have agreed that the factors which applied to this act when it was enacted in 1931 are no longer relevant. The Committee supports such a position and has estimated savings of \$52,000,000 in fiscal year 1986 with the enactment of this legislation. The provision is as follows:

SEC. 128. (a) Subsection (a) of the first section of the Act entitled "An Act relating to the rate of wages for laborers and mechanics employed on public buildings of the United States and the District of Columbia by contractors and subcontractors, and for other purposes" approved March 3, 1931 (40 U.S.C. 276a(a)), commonly known as the Davis-Bacon Act is amended—

(1) by inserting "(1)" after "(a)";

(2) by inserting "or, in the case of contracts awarded by the Department of Defense, every contract in excess of \$1,000,000" after "\$2,000" in the first sentence; and

(3) by adding at the end thereof the following new paragraph:

"(2)(A) The minimum wages provided for in paragraph (1) in the case of a construction, alteration, or repair contract awarded by the Department of Defense shall be the prevailing wages determined by the Secretary of Labor under subparagraph (B).

"(B) For purposes of subparagraph (A), the Secretary of Labor shall base his determination of the wages prevailing for the corresponding classes of laborers, mechanics, and helpers on—

"(i) the wage paid to 50 per centum or more of the corresponding classes of laborers, mechanics, and helpers employed on private industry projects of a character similar to the contract work in the urban or rural civil subdivision of the State in which the work is to be performed, or in the District of Columbia if the work is to be performed there;
or

"(ii) if the same wage is not paid to 50 per centum or more of the laborers, mechanics, and helpers in the corresponding classes, the weighted average of the wages paid to the corresponding classes of laborers, mechanics, and helpers employed on private industry projects of a character similar to the contract work in the urban or rural civil subdivision of the State in which the work is to be performed, or in the District of Columbia if the work is to be performed there."

(b)(1) The first section of such Act is further amended—

(A) by striking out "mechanics and/or laborers" in subsection (a)(1) and inserting in lieu thereof "laborers, mechanics, helpers, or any combination thereof";

(B) by striking out "laborers and mechanics" wherever it appears and inserting in lieu thereof "laborers, mechanics, and helpers";

(C) by striking out "mechanics and laborers" in subsection (a)(1) and inserting in lieu thereof "laborers, mechanics, and helpers"; and

(D) by striking out "laborer or mechanic" in subsection (b) and inserting in lieu thereof "laborer, mechanic, or helper".

(2) Section 2 of such Act (40 U.S.C. 276a-1) is amended by striking out "laborer or mechanic" and inserting in lieu thereof "laborer, mechanic, or helper".

(3) Section 3 of such Act (40 U.S.C. 276a-2) is amended by striking out "laborers and mechanics" wherever it appears and inserting in lieu thereof "laborers, mechanics, and helpers".

COMPLIANCE WITH RULE XVI, PARAGRAPH 7

Rule XVI, paragraph 7 states:

Every report on general appropriation bills filed by the Committee on Appropriations shall identify with particularity each recommended amendment which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session.

The Committee is recommending the following projects as amendment to appropriations contained in the bill and which are not authorized:

Alaska:

Eielson AFB: Central heat plant \$25,500,000

Fort Wainwright: Community impact assistance 1,000,000

Florida: MacDill AFB: Add/alter REDCOM headquarters 1,500,000

Georgia: Fort Benning: Upgrade unaccompanied officer housing 11,400,000

Germany: Various locations: Pershing II missile security 56,000,000

Hawaii:

Com. Oceanographic Sys. Pacific, Pearl Harbor: Naval ocean processing facility add 1,180,000

Wheeler AFB: Gymnasium 2,200,000

COMPLIANCE WITH RULE XXVI, PARAGRAPH 12

Rule XXVI, paragraph 12 states:

Whenever a committee reports a bill or joint resolution repealing or amending any statute or part thereof it shall make a report thereon and shall include in such report or in an accompanying document (to be prepared by the staff of such

committee) (a) the text of the statute or part thereof which is proposed to be repealed; and (b) a comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken-through type and italics, parallel columns, or other appropriate typographical devices the omissions and insertions which would be made by the bill or joint resolution if enacted in the form recommended by the committee. This paragraph shall not apply to any such report in which it is stated that, in the opinion of the Committee it is necessary to dispense with the requirements of this subsection to expedite the business of the Senate.

The Committee has included a change to the so-called Davis-Bacon Act (40 U.S.C. 276a(a)) as follows:

An Act relating to the rate of wages for laborers and mechanics employed on public buildings of the United States and the District of Columbia by contractors and subcontractors, and for other purposes.

(46 Stat. 1494; 40 U.S.C. 276a-2)

That (a)(1) The advertised specifications for every contract in excess of \$2,000 *or, in the case of contracts awarded by the Department of Defense, every contract in excess of \$1,000,000,* to which the United States or the District of Columbia is a party, for construction, alteration, and/or repair, including painting and decorating, of public buildings or public works of the United States or the District of Columbia within the geographical limits of the States of the Union, or the District of Columbia, and which requires or involves the employment of ~~mechanics and/or laborers~~ *laborers, mechanics, helpers, or any combination thereof* shall contain a provision stating the minimum wages to be paid various classes of laborers and mechanics which shall be based upon the wages that will be determined by the Secretary of Labor to be prevailing for the corresponding classes of ~~laborers and mechanics~~ *laborers, mechanics, and helpers* employed on projects of a character similar to the contract work in the city, town, village, or other civil subdivision of the State, in which the work is to be performed, or in the District of Columbia if the work is to be performed there; and every contract based upon these specifications shall contain a stipulation that the contractor or his subcontractor shall pay all ~~mechanics and laborers~~ *laborers, mechanics, and helpers* employed directly upon the site of the work, unconditionally and not less often than once a week, and without subsequent deduction or rebate on any account, the full amounts accrued at time of payment, computed at wage rates not less than those stated in the advertised specifications, regardless of any contractual relationship which may be alleged to exist be-

tween the contractor or subcontractor and such ~~laborers and mechanics~~ laborers, mechanics, and helpers, and that the scale of wages to be paid shall be posted by the contractor in a prominent and easily accessible place at the site of the work; and the further stipulation that there may be withheld from the contractor so much of accrued payments as may be considered necessary by the contracting officer to pay to ~~laborers and mechanics~~ laborers, mechanics, and helpers employed by the contractor or any subcontractor on the work the difference between the rates of wages required by the contract to be paid ~~laborers and mechanics~~ laborers, mechanics, and helpers on the work and the rates of wages received by such ~~laborers and mechanics~~ laborers, mechanics, and helpers and not refunded to the contractor, subcontractors, or their agents.

(2)(A) *The minimum wages provided for in paragraph (1) in the case of a construction, alteration, or repair contract awarded by the Department of Defense shall be the prevailing wages determined by the Secretary of Labor under subparagraph (B).*

"(B) For purposes of subparagraph (A), the Secretary of Labor shall base his determination of the wages prevailing for the corresponding classes of laborers, mechanics, and helpers on—

"(i) the wage paid to 50 per centum or more of the corresponding classes of laborers, mechanics, and helpers employed on private industry projects of a character similar to the contract work in the urban or rural civil subdivision of the State in which the work is to be performed, or in the District of Columbia if the work is to be performed there;

or

"(ii) if the same wage is not paid to 50 per centum or more of the laborers, mechanics, and helpers in the corresponding classes, the weighted average of the wages paid to the corresponding classes of laborers, mechanics, and helpers employed on private industry projects of a character similar to the contract work in the urban or rural civil subdivision of the State in which the work is to be performed, or in the District of Columbia if the work is to be performed there.

(b) As used in this Act the term "wages", "scale of wages", "wage rates", "minimum wages", and "prevailing wages" shall include—

(1) the basic hourly rate of pay; and

(2) the amount of—

(A) the rate of contribution irrevocably made by a contractor or subcontractor to a trustee or to a third person pursuant to a fund, plan, or program; and

(B) the rate of costs to the contractor or subcontractor which may be reasonably anticipated in pro-

viding benefits to ~~laborers and mechanics~~ *laborers, mechanics, and helpers* pursuant to an enforceable commitment to carry out a financially responsible plan or program which was communicated in writing to the ~~laborers and mechanics~~ *laborers, mechanics, and helpers* affected,

for medical or hospital care, pensions on retirement or death, compensation for injuries or illness resulting from occupational activity, or insurance to provide any of the foregoing, for unemployment benefits, life insurance, disability and sickness insurance, or accident insurance, for vacation and holiday pay, for defraying costs of apprenticeship or other similar programs, or for other bona fide fringe benefits, but only where the contractor or subcontractor is not required by other Federal, State, or local law to provide any of such benefits:

Provided, That the obligation of a contractor or subcontractor to make payment in accordance with the prevailing wage determinations of the Secretary of Labor, insofar as this Act and other Acts incorporating this Act by reference are concerned may be discharged by the making of payments in cash, by the making of contributions of a type referred to in paragraph (2) (A), or by the assumption of an enforceable commitment to bear the costs of a plan or program of a type referred to in paragraph (2) (B), or any combination thereof, where the aggregate of any such payments, contributions, and costs is not less than the rate of pay described in paragraph (1) plus the amount referred to in paragraph (2).

In determining the overtime pay to which the ~~laborer or mechanic~~ *laborer, mechanic, or helper* is entitled under any Federal law, his regular or basic hourly rate of pay (or other alternative rate upon which premium rate of overtime compensation is computed) shall be deemed to be the rate computed under paragraph (1), except that where the amount of payments, contributions, or costs incurred with respect to him exceeds the prevailing wage applicable to him under this Act, such regular or basic hourly rate of pay (or such other alternative rate) shall be arrived at by deducting from the amount of payments, contributions, or costs actually incurred with respect to him, the amount of contributions or costs of the types described in paragraph (2) actually incurred with respect to him, or the amount determined under paragraph (2) but not actually paid, whichever amount is the greater.

SEC. 2. Every contract within the scope of this Act shall contain the further provision that in the event it is found by the contracting officer that any ~~laborer or mechanic~~ *laborer, mechanic, or helper* employed by the contractor or any subcontractor directly on the site of the work covered by the contract has

been or is being paid a rate of wages less than the rate of wages required by the contract to be paid as aforesaid, the Government may, by written notice to the contractor, terminate his right to proceed with the work or such part of the work as to which there has been a failure to pay said required wages and to prosecute the work to completion by contract or otherwise, and the contractor and his sureties shall be liable to the Government for any excess costs occasioned the Government thereby.

SEC. 3. The Comptroller General of the United States is authorized and directed to pay directly to ~~laborers and mechanics~~ *laborers, mechanics, and helpers* from any accrued payments withheld under the terms of the contract any wages found to be due laborers and mechanics pursuant to this Act; and the Comptroller General of the United States is further authorized and is directed to distribute a list to all departments of the Government giving the names of persons or firms whom he has found to have disregarded their obligations to employees and subcontractors. No contract shall be awarded to the persons or firms appearing on this list or to any firm, corporation, partnership, or association in which such persons or firms have an interest until three years have elapsed from the date of publication of the list containing the names of such persons or firms.

(b) If the accrued payments withheld under the terms of the contract, as aforesaid, are insufficient to reimburse all the ~~laborers and mechanics~~ *laborers, mechanics, and helpers*, with respect to whom there has been a failure to pay the wages required pursuant to this Act, such ~~laborers and mechanics~~ *laborers, mechanics, and helpers* shall have the right of action and/or of intervention against the contractor and his sureties conferred by law upon persons furnishing labor or materials, and in such proceedings it shall be no defense that such ~~laborers and mechanics~~ *laborers, mechanics, and helpers* accepted or agreed to accept less than the required rate of wages or voluntarily made refunds.

* * * * *

MINORITY VIEWS OF MR. SASSER

Growing economic, political, and military instability in the Philippines jeopardizes continued U.S. access to military bases. The Committee has urged the Department of Defense to provide accelerated security upgrades at U.S. facilities to increase safety for personnel and equipment. However, physical security enhancements, alone, will not ensure continued U.S. access to these vital facilities.

The Marcos government must institute prompt reforms if stability is to be restored before the Communist insurgency spirals out of control and threatens the U.S. presence. The United States must, therefore, use appropriate leverage to accelerate such reforms which could restore national stability to the Philippines.

The United States should withhold large military construction investments in the Philippines until stability is restored. Increasing military construction funding at this juncture sends the wrong signal to President Marcos. A moratorium should be placed on such investments (except for needed security enhancements) until the sources of instability which feed the guerrilla insurgency and threaten U.S. bases are being eliminated.

The United States must also initiate contingency planning for military construction at other Pacific locations to guard against the potential loss of vital military missions presently being performed in the Philippines and to demonstrate that alternatives to Philippine bases can be developed.

JIM SASSER.
